CHAPTER 2 Thinking about World Politics: Theory and Reality

MULTIPLE CHOICE

- 1. It is argued that peace in Europe between the Napoleonic Wars and World War I was kept by
 - a. President Wilson placing U.S. troops on alert in Europe.
 - b. a systemic balance of power.
 - c. the League of Nations conference.
 - d. the UN Security Council resolutions.

ANS: B REF: 21

- 2. One of the major conclusions reached by liberals after World War I was that
 - a. idealism was not a strong basis for maintaining peace.
 - b. the League of Nations system was fatally flawed.
 - c. the balance-of-power system was fatally flawed.
 - d. the nation-state system was fatally flawed.

ANS: C REF: 21

- 3. After World War I, President Woodrow Wilson advocated the establishment of the
 - a. Organization of American States and a balance-of-power system.
 - b. United Nations with a veto power for major powers.
 - c. League of Nations and other institutions of international law.
 - d. International Monetary Fund and the World Bank.

ANS: C REF: 22

- 4. After World War II, liberal reformers emphasized the creation of a new
 - a. balance of power system.

c. realpolitik.

b. society of states.

d. self-help system.

ANS: B REF: 22

- 5. Which of the following was never a member of the League of Nations?
 - a. United Kingdom

c. Russia

b. France

d. United States

ANS: D REF: 22

- 6. After World War II, the liberals advocated the establishment of
 - a. the UN and a balance-of-power system.
 - b. NATO and a balance-of-power system.
 - c. the UN and the spread of democracy.
 - d. the Warsaw Pact to promote socialism and defeat capitalist imperialism.

ANS: C REF: 22

- 7. Nation-states are by far the most important organizations in world politics, according to
 - a. liberals.

c. realists.

b. radicals.

d. transnationalists.

ANS: C REF: 22

8. Realists argue that international organizations like the UN are

important organizations that promote and maintain world peace. b. important organizations because they promote justice and equality among all powers. c. only as important as their most powerful members wish them to be. d. fronts for communist and socialist expansion. ANS: C **REF: 22** 9. Liberalism is good at explaining a. realpolitik. b. the competitive self-interest of states. c. fights and threats among actors in the system. d. international environmental cooperation. ANS: D **REF: 22** 10. Which of the following schools assumes that most nation-states are rational, unitary actors pursuing goals of national interest, irrespective of their form of government or type of economic organization? a. Liberalism c. Realist b. Radicalism d. Transnationalism ANS: C REF: 22 11. Which of the following schools stress the apparent rise in economic cooperation in the international? a. Liberalism c. Realism b. Radicalism d. Transnationalism ANS: A REF: 22 12. Realists insisted that nation-state behavior can be best explained by a. the advancement of international organizations. b. the anarchic nature of the international system. c. the good-will of leaders. d. democratic values. ANS: B **REF: 23** 13. According to realists, people are a. naïve. c. self-interested. b. inclined toward cooperation. d. inclined toward violence. ANS: C REF: 23 14. Which of the following schools argues that governments pursue not abstract national interest but the interest of dominant class or classes? a. Liberalism c. Realist b. Radicalism d. Transnationalism ANS: B REF: 23 15. Which of the following two schools share the conviction that people are rational and are motivated largely by self-interest? a. Realist and liberal c. Constructivist and radical b. Realist and radical d. Liberal and neorealist

REF: 23

ANS: B

16.	6. The realist notion of self-help refers to a. the desire of nation-states to appeal to a higher au b. the tendency of nation-states to band together in to c. the consequences of an liberal view of the world. d. the reality that states must look out for their own	times of crisis.
	ANS: D REF: 23	
17.	maintain their power and exploit other classes? a. Realism c. F	sm and wars are caused by capitalists' attempts to Radicalism Rationalist
	ANS: C REF: 24	
18.	a. Liberalism and radicalism c. F	of non-state actors? Realism and liberalism Liberalism and socialism
	ANS: A REF: 25	
19.		
	ANS: B REF: 25	
20.	a. Realist c. F	rs as agents, with interests and capabilities? Radical Rationalist
	ANS: D REF: 25	
21.	"realities" or logic of anarchy? a. Rationalist c. C	es the notion that behavior is dictated by the Constructivist Liberal
	ANS: C REF: 26–27	
22.	processes? a. Realist c. F	eptions of threats are the result of ongoing social Radical Rationalist
	ANS: B REF: 26–27	
23.	a. reflectivists. c. r.	adicals. ationalists.
24.	 Which group of scholars believes that scientific objection. Reflectivists Reflectivists 	ctivity is NOT achievable in social science? Radicals

	b. Constructivists d. Rationalists	
	ANS: A REF: 28	
25.	Historical approaches to international relations stressed a. dialectical materialism. c. comparability. b. ethical and moral issues. d. description of unique events. ANS: D REF: 29	
26.	The new "social scientific approach" that was adopted following World War II assumed that a. international politics was best studied through an historical perspective. b. patterns of social behavior were nonexistent. c. individuals and nation-states are not social beings. d. knowledge could be acquired by investigating patterns of social behavior.	
	ANS: D REF: 29	
27.	Social scientific approaches to understanding the world a. rule out chance. b. replace historical trends with historical facts. c. are absolute laws of probability and behavior. d. assume knowledge can be acquired by studying patterns of social behavior.	
	ANS: D REF: 29	
28.	When used in the social sciences and more specifically in the study of international relations, the comparative method a. distinguishes facts from opinions in an attempt to predict the future. b. looks for patterns, not uniqueness, while using the past to serve as a guide for the future. c. separates politics from economics while attempting to explain the past and future. d. uses highly descriptive single-case studies with no attempt to accumulate knowledge.	
	ANS: B REF: 29–30	
29.	A theory is an intellectual tool that a. is not anything like a model. b. helps us to see how phenomena are interrelated. c. is a set of organized truths about the world. d. is the most precise statement one can make.	
	ANS: B REF: 30	
30.	Checking predictions against observed data, an activity central to the scientific method, is known a. hypothesis testing. c. the comparative method. b. common sense. d. a thought experiment.	ı as

ANS: A REF: 32

31. In the study of international relations, theories

a. can predict future events.

c. are probabilistic explanations.d. None of the above are true. b. make world politics more complex.

ANS: C REF: 32

32. The main difference between the physical and social sciences is

- a. it is more difficult to uncover the process of causation underlying correlation in the social sciences
- b. physical science studies make greater contributions to cumulative knowledge building.
- c. everything can be held constant in the physical sciences and nothing can be held constant in social sciences.
- d. social sciences create better knowledge for humanity.

ANS: A REF: 33

- 33. Assumptions are
 - a. statements that simplify the task of theory building.
 - b. statements that make the greatest difference in bringing about an outcome.
 - c. statements that connects an explanation to possible real-world observations.
 - d. statements that suggest states' interests are socially constructed.

ANS: C REF: 33

- 34. The difference between an independent and a dependent variables is
 - a. dependent variables explain observed outcomes.
 - b. an independent variable explains observed outcomes.
 - c. a dependent variable is an outcome we attempt to explain.
 - d. an independent variable is an outcome we attempt to explain.

ANS: C REF: 37

- 35. Empirical theory building includes
 - a. finding the causal connection between forces and outcomes.
 - b. determining the rightness and wrongness of state actions.
 - c. constructing models of what international actors do, how they do it, and why.
 - d. rejecting a series of inaccurate hypotheses.

ANS: C REF: 38

- 36. The scientific method
 - a. provides us with a lens to understand how states ought to behave.
 - b. is a systematic way of obtaining information and making generalizations.
 - c. is the only value-free method for building theory.
 - d. is the only correct method for understanding all the nuances of world politics.

ANS: B REF: 38

- 37. According to some realist scholars, the ethics of world politics is best described as
 - a. justice will always prevail.

c. capitalists that exploit the poor.

b. might makes right.

d. no bad deed goes unpunished.

ANS: B REF: 40

ESSAY

1. Describe how the world works according to realists, liberals, and radicals. Provide examples.

ANS:

Students' answers may vary.

2.	Describe how the world works according to rationalists, constructivists, and reflectivists. Provide examples.
	ANS: Students' answers may vary.
3.	What are the differences between realist and liberal theories on explaining the nature of the system, the important actors, and the nature of their interaction? Explain.
	ANS: Students' answers may vary.

ANS:

Students' answers may vary.

5. What are the core assumptions for realism, liberalism and radicalism? Which group of assumptions most accurately depicts world politics? Explain.

4. How does the social scientific approach to the study of international relations differ from the study of

ANS:

Students' answers may vary.

6. What is the role of morality and ethics in world politics? Explain.

international history and international law? Explain.
