

Corporate Finance Online, 2e (Eakins/McNally)
Chapter 2 Financial Statements and Ratio Analysis

LO1: Describe the Three Financial Statements Needed for Financial Analysis

1) Using financial information to aid in decision making is called

- A) "what-if" analysis.
- B) factor analysis.
- C) financial analysis.
- D) quantitative analysis.
- E) managerial economics.

Answer: C

Explanation: C) Financial analysis is the process of using financial information to assist in investment and financial decision making.

Diff: 1

Section: 1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

2) Which of the following is NOT a commonly used source of information for financial analysis?

- A) A consultant's analysis of industry conditions
- B) Key employees' guesses about future trends
- C) The Securities and Exchange Commission's filings
- D) The firm's annual report
- E) The economic data from a forecasting firm

Answer: B

Explanation: B) Financial analysis is the process of using financial information to assist in investment and financial decision making.

Diff: 1

Section: 1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

3) Which of the following is one of the financial statements critical to financial statement analysis?

- A) 8-K
- B) SEC registration statement
- C) Disclosure
- D) 10-Q
- E) Statement of Cash Flows

Answer: E

Explanation: E) The three financial statements critical to analysis are the balance sheet, the income statement, and the statement of cash flows.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

4) Which of the following is a variation of the accounting identity?

- A) $\text{Assets} - \text{Fixed assets} = \text{Equity} - \text{Liabilities}$
- B) $\text{Owner's equity} = \text{Assets} - \text{Liabilities}$
- C) $\text{Equity} - \text{Liabilities} = \text{Assets}$
- D) $\text{Assets} + \text{Equity} = \text{Liabilities}$
- E) $\text{Assets} + \text{Lease obligations} = \text{Equity} + \text{Liabilities}$

Answer: B

Explanation: B) $\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

5) Balance sheets

- A) show how the firm raised funds to purchase assets.
- B) report a firm's activities over a period of time.
- C) describe a firm's cash flows.
- D) provide information about a firm's labor costs.
- E) may not balance if the firm suffered a net loss.

Answer: A

Explanation: A) Liabilities and owners' equity provide the funds for the purchase of assets.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

6) The right-hand side of the balance sheet shows

- A) the cash flow generated by a firm's assets.
- B) how the firm financed its assets.
- C) the level of accumulated depreciation.
- D) profits earned by the firm in the current period.
- E) the firm's good will.

Answer: B

Explanation: B) Right-hand side shows liabilities and owners equity.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

7) The _____ is a snapshot of the firm at a particular point in time.

- A) income statement
- B) statement of cash flows
- C) statement of retained earnings
- D) balance sheet
- E) None of the above

Answer: D

Explanation: E) The balance sheet is a financial snapshot of the firm.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

8) An income statement contains all of the following EXCEPT

- A) revenues.
- B) assets.
- C) losses.
- D) gains.
- E) expenses.

Answer: B

Explanation: B) Income statements show revenues—expenses which result in losses or gains.

Diff: 1

Section: 1.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

9) Which of the following is NOT included in a cash flow statement?

- A) Labor productivity
- B) Interest earnings
- C) Cash flow from operations
- D) Depreciation expense
- E) The increase in long-term debt

Answer: A

Explanation: A) The statement of cash flows only deals with cash inflows and outflows.

Diff: 1

Section: 1.3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

10)

Le Chateau Inc	
(\$000s)	
	Year 1
Sales	161,120
Cost of Goods Sold	105,035
SG&A	42,957
Depreciation	6,687
Operating Income (EBIT)	6,441
Interest Expense	787
Earnings before Income Taxes	5,654
Income Taxes	2,262
Net Income	3,392
Dividends (total)	1,974
Cash	9,071
Accounts Receivables	4,106
Inventory	22,123
Total Current Assets	35,300
Fixed Assets (Net)	38,202
Other Assets	686
Total Assets	74,188
LIABILITIES AND SHAREHOLDERS' EQUITY	
Accounts Payable	12,027
Other Current Liabilities	494
Total Current Liabilities	12,521
Long Term Debt	9,868
Common Share Capital	13,428
Retained Earnings	38,371
Total Shareholders' Equity	51,799
Total Liabilities & Shareholders' Equity	74,188

What is short-term debt for Le Chateau?

- A) 0
- B) 494
- C) 9,868
- D) 12,027

Answer: A

Explanation: A) Le Chateau has no short-term debt in current liabilities.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

11) What is the connection between the income statement and the balance sheet?

A) The income statement captures the flow of activity during the year and the balance sheet is a 'snapshot' of the company at the end of the year.

B) The income statement shows the profit earned by the owners and the balance sheet shows the book value of the owner's equity.

C) Net income (minus dividends) is added to retained earnings in the balance sheet.

D) Accounting laws require that companies report both statements.

E) The cash flow statement draws from both the income statement and the balance sheet.

Answer: C

Explanation: C) Net income (minus dividends) is added to retained earnings in the balance sheet.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

12) The left-hand side of the balance sheet reports the book value of the assets that the company has and the right-hand side reports how they were financed.

Answer: TRUE

Explanation: The left-hand side of the balance sheet reports assets and the right-hand side reports liabilities and owners' equity. The liabilities and owners' equity show, mainly, the original value of the investments made by owners and lenders.

Diff: 1

Section: 1.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

13) Earnings are the same thing as net income.

Answer: TRUE

Explanation: Net income is the company's profit. Synonyms include earnings.

Diff: 1

Section: 1.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

LO2: Explain the Goals of Financial Statement Analysis

1) Section 2.2 does not contain any questions.

LO3: Perform Financial Statement Analysis

- 1) In cross-sectional analysis, a firm's financial ratios are
- A) judged against the performance of firms in the same industry.
 - B) compared with the firm's ratios from the most recent period.
 - C) compared with ratios from all firms.
 - D) compared with a general standard.
 - E) plotted over time to isolate trends.

Answer: A

Explanation: A) Cross sectional analysis is the comparison of one firm to other similar firms.

Diff: 1

Section: 3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

- 2) The four-digit codes used by the government to classify firms into industries are known as
- A) ratio standards.
 - B) EIC codes.
 - C) USIC codes.
 - D) financial benchmarks.
 - E) SIC codes.

Answer: E

Explanation: E) Standard Industrial Classification (SIC) codes are four-digit codes given to firms by the government.

Diff: 1

Section: 3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

- 3) When financial ratios are compared to financial ratios from previous years, a _____ is conducted.
- A) cross-time
 - B) SIC code
 - C) time series
 - D) cross-sectional
 - E) None of the above

Answer: C

Explanation: C) A time series analysis involves comparing the firm's current performance to prior periods.

Diff: 1

Section: 3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

- 4) All of the following are problems with cross-sectional financial analysis EXCEPT that
- A) an industry may be dominated by a few firms.
 - B) annual reports sometimes do not disclose divisional financial data.
 - C) many firms are conglomerates.
 - D) it provides no basis for comparison to other firms.
 - E) there may be no obvious firms to be used for comparison.

Answer: D

Explanation: D) All of the following are problems with cross-sectional financial analysis except that it provides no basis for comparison to other firms.

Diff: 1

Section: 3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

- 5) Each of the following is a ratio category EXCEPT

- A) productivity ratios.
- B) market ratios.
- C) liquidity ratios.
- D) financing ratios.
- E) activity ratios.

Answer: A

Explanation: A) Ratios are grouped into categories: Profitability, Liquidity, Activity, Financing, and Market.

Diff: 1

Section: 3.1

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

- 6) _____ ratios measure the efficiency with which assets are converted to sales or cash.

- A) Liquidity
- B) Activity
- C) Profitability
- D) Market
- E) Financing

Answer: B

Explanation: B) Activity ratios measure the efficiency with which assets are converted to sales or cash.

Diff: 1

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

7) Find the return on assets if net income was \$55,000, total assets are \$115,000, EBIT was \$100,000, and equity is \$75,000.

- A) 73.3%
- B) 63.1%
- C) 87.0%
- D) 47.8%
- E) 55.0%

Answer: D

Explanation: D) Return on assets = $\frac{\text{Net income after tax}}{\text{Total assets}}$

$$\text{Return on assets} = \frac{55,000}{115,000} = 47.8\%$$

Diff: 2

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

8) What is the return on equity if net income was \$55,000, total assets are \$115,000, EBIT was \$100,000, and equity is \$75,000?

- A) 47.8%
- B) 63.1%
- C) 73.3%
- D) 87.0%
- E) 55.0%

Answer: C

Explanation: C) Return on equity = $\frac{\text{Net income after tax}}{\text{Common equity}}$

$$\text{Return on equity} = \frac{55,000}{75,000} = 73.3\%$$

Diff: 2

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

9) Sales for a firm are \$500,000, cost of goods sold are \$400,000, and interest expenses are \$20,000. What is the gross profit margin?

- A) 16.0%
- B) 20.0%
- C) 4.0%
- D) 25.0%
- E) 30.0%

Answer: B

Explanation: B) Gross profit margin = $\frac{\text{Sales} - \text{Cost of goods sold}}{\text{Sales}}$

$$\text{Gross profit margin} = \frac{500,000 - 400,000}{500,000} = 20\%$$

Diff: 2

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

10) If net income was \$10,000, interest expense was \$4,000, and taxes were \$1,000, what is the operating profit margin if sales were \$50,000?

- A) 28%
- B) 30%
- C) 22%
- D) 10%
- E) 20%

Answer: B

Explanation: B) Operating profit margin = $\frac{\text{Operating profits}}{\text{Sales}}$

$$\text{Operating profit margin} = \frac{10,000 + 4,000 + 1,000}{50,000} = 30\%$$

Diff: 2

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

11) If net income after tax was \$10,000, interest expense was \$4,000, and taxes were \$1,000, what is the net profit margin if sales were \$50,000?

- A) 10%
- B) 30%
- C) 22%
- D) 28%
- E) 20%

Answer: E

Explanation: E) Net profit margin = $\frac{\text{Net income after tax}}{\text{Sales}}$

$$\text{Net profit margin} = \frac{10,000}{50,000} = 20\%$$

Diff: 2

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

12) The quick ratio improves upon the current ratio by

- A) using more up-to-date information.
- B) simplifying the calculation.
- C) subtracting intangible assets like goodwill.
- D) recognizing that inventory is the current asset that is easiest to value.
- E) recognizing that inventory is the least liquid current asset.

Answer: E

Explanation: E) Since inventory may not always be easily converted into cash, the quick ratio is a more conservative measure of liquidity.

Diff: 1

Section: 3.3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

13) What is the quick ratio if cash is \$10,000, accounts receivable are \$25,000, inventories are \$30,000, accounts payable are \$40,000, and accrued payroll is \$15,000?

- A) 2.00
- B) 1.18
- C) 0.73
- D) 1.13
- E) 0.09

Answer: E

Explanation: E) Quick ratio = $\frac{\text{Current assets} - \text{Inventory}}{\text{Current liabilities}}$

$$\text{Quick ratio} = \frac{10,000 + 25,000 - 30,000}{40,000 + 15,000} = 0.09$$

Diff: 3

Section: 3.3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

14) What is the current ratio if cash is \$10,000, accounts receivable are \$25,000, inventories are \$30,000, accounts payable are \$40,000, and accrued payroll is \$15,000?

- A) 2.00
- B) 1.18
- C) 1.13
- D) 0.64
- E) 0.73

Answer: B

Explanation: B) Current ratio = $\frac{\text{Current assets}}{\text{Current liabilities}}$

$$\text{Current ratio} = \frac{10,000 + 25,000 + 30,000}{40,000 + 15,000} = 1.18$$

Diff: 3

Section: 3.3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

15) The quick ratio is 1.0. Current assets are \$100,000 and current liabilities are \$80,000. What is the amount in the inventory account?

- A) \$20,000
- B) \$80,000
- C) \$125,000
- D) \$180,000
- E) Cannot be determined with the information provided.

Answer: A

Explanation: A) Quick ratio = $\frac{\text{Current assets} - \text{Inventory}}{\text{Current liabilities}}$

$$1 = \frac{100,000 - X}{80,000}$$

$$80,000 = 100,000 - X$$

$$X = 20,000$$

Diff: 3

Section: 3.3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

16) Find accounts receivable turnover if a firm has an accounts receivable of \$80,000, a total asset turnover of .75, and total assets of \$230,000.

- A) 2.15
- B) 3.8
- C) 2.9
- D) 1.5
- E) .65

Answer: A

Explanation: A) Accounts receivable turnover = $\frac{\text{Sales}}{\text{Accounts receivable}}$

Step 1 - Use total asset turnover to calculate sales.

$$\text{Total asset turnover} = \frac{\text{Sales}}{\text{Total assets}}$$

$$.75 = \frac{\text{Sales}}{230,000}$$

$$\text{Sales} = 172,500$$

Step 2 - Use the sales figure to solve for accounts receivable turnover.

$$\text{Accounts receivable turnover} = \frac{172,500}{80,000} = 2.15$$

Diff: 3

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

17) Which of the following statements is TRUE?

- A) The quick ratio is classified as an activity ratio.
- B) Current assets are expected to be converted into cash in less than 2 years.
- C) A firm's debt holders prefer a low quick ratio.
- D) Activity ratios go hand in hand with liquidity ratios
- E) Lower current ratios are always preferable.

Answer: D

Explanation: D) Activity ratios go hand in hand with liquidity ratios.

Diff: 1

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

18) What is a firm's total asset turnover if its fixed assets are \$120,000, current assets are \$30,000, current liabilities are \$44,000, sales were \$200,000, and net income was \$75,000?

- A) 0.5 times
- B) 2.2 times
- C) 1.3 times
- D) 2.0 times
- E) 1.7 times

Answer: C

Explanation: C) Total asset turnover = $\frac{\text{Sales}}{\text{Total assets}}$

$$\text{Total asset turnover} = \frac{200,000}{120,000 + 30,000} = 1.3$$

Diff: 3

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

19) A firm has current assets of \$350,000, current liabilities of \$200,000, cost of goods sold of \$250,000, and inventory of \$75,000. The firm's inventory turnover is

- A) 5.0 times.
- B) 3.3 times.
- C) 2.7 times.
- D) 2.0 times.
- E) 4.7 times.

Answer: B

Explanation: B) Inventory turnover = $\frac{\text{Cost of goods sold}}{\text{Inventory}}$

$$\text{Inventory turnover} = \frac{250,000}{75,000} = 3.3$$

Diff: 2

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

20) What is a firm's times interest earned if it posts revenues of \$200,000, taxes of \$35,000, expenses of \$100,000, and interest of \$30,000?

- A) 3.3 times
- B) 2.0 times
- C) 2.2 times
- D) 0.5 times
- E) 1.3 times

Answer: A

Explanation: A) Times interest earned = $\frac{\text{Earnings before interest and taxes}}{\text{Interest}}$

$$\text{Times interest earned} = \frac{200,000 - 100,000}{30,000} = 3.3$$

Diff: 3

Section: 3.5

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

21) If a firm's total asset turnover is low, but its fixed asset turnover is high, which of the following ratios should an analyst examine to locate the source of the problem?

- A) Debt/equity
- B) Price/earnings
- C) Return on equity
- D) Accounts receivable turnover
- E) Times interest earned

Answer: D

Explanation: D) Accounts receivable is a part of total assets and is a logical next step to check if fixed assets turnover is high.

Diff: 1

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

22) A firm has sales of \$1 million, net income of \$250,000, total current assets of \$300,000, and accounts receivable of \$200,000. The firm's accounts receivable turnover is

- A) 0.33 times.
- B) 0.20 times.
- C) 1.50 times.
- D) 5.00 times.
- E) 1.25 times.

Answer: D

Explanation: D) Accounts receivable turnover = $\frac{\text{Sales}}{\text{Accounts receivable}}$

$$\text{Accounts receivable turnover} = \frac{1,000,000}{200,000} = 5$$

Diff: 2

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

23) A firm has accounts receivable of \$150,000. During the year, total sales are \$500,000, of which \$300,000 are cash sales. What is the average collection period?

- A) 109.5 days
- B) 182.5 days
- C) 273.8 days
- D) 486.7 days
- E) None of the above

Answer: C

Explanation: C) Average collection period = $\frac{365 \text{ days}}{\text{Receivables turnover}}$

$$\text{Average collection period} = \frac{365 \text{ days}}{(200,000 / 150,000)} = 273.8 \text{ days}$$

Diff: 3

Section: 3.4

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

24) What is a firm's debt ratio if its total assets are \$135,000, equity is \$75,000, current liabilities are \$24,000, and total liabilities are \$105,000?

- A) 140%
- B) 110%
- C) 50%
- D) 60%
- E) 78%

Answer: E

Explanation: E) Debt ratio = $\frac{\text{Total liabilities}}{\text{Total assets}}$

$$\text{Debt ratio} = \frac{105,000}{135,000} = 78\%$$

Diff: 2

Section: 3.5

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

25) Market ratios differ from other ratios because

- A) they are based on information not contained in the firm's financial statements.
- B) they are the only ratios that may have negative values.
- C) they are the most important ratios to shareholders.
- D) they are the only ratios that relate equity measures to other variables.
- E) they are less precise.

Answer: A

Explanation: A) Market ratios are distinct from other ratios in that they are based, at least in part, on information not contained in the firm's financial statements.

Diff: 1

Section: 3.6

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

26) If a firm has 100,000 shares of common stock outstanding and has just recorded a \$45,000 profit, what is its price/earnings ratio if its current share price is \$35?

- A) 0.78
- B) 0.45
- C) 14.00
- D) 45.00
- E) 78.00

Answer: E

Explanation: E) PE ratio = $\frac{\text{Market price of common stock}}{\text{Earnings per share}}$

$$\text{PE ratio} = \frac{\$35}{(\$45,000 / 100,000)} = 78$$

Diff: 2

27) Which type of ratio measures how effectively the firm uses its resources to generate income?

- A) Activity
- B) Liquidity
- C) Profitability
- D) Leverage
- E) Market

Answer: C

Explanation: C) Profitability ratios measure how effectively the firm uses its resources to generate income.

Diff: 1

Section: 3.2

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

28) Your banker is concerned about your company's liquidity. Which of the following actions would increase the firm's current ratio and ease the bank's concern?

- A) Sell some inventory for cash.
- B) File for bankruptcy.
- C) Call your convertible bonds and thereby force the bond holders to become shareholders.
- D) Sell some of the firm's long-term bonds and purchase marketable securities.
- E) Sell long-term bonds to purchase new machinery.

Answer: D

Explanation: D) The current ratio is calculated as current assets/current liabilities.

Any action to increase current assets and/or decrease current liabilities will improve the ratio.

The correct answer in this case is the choice of selling the long-term bonds and purchasing marketable securities as it is the option that results in the best net change in either of the current ratio variables (in this case current assets).

Total Liabilities and Shareholders' Equity	8,548,900	7,752,400

29)

Blockbuster Inc.

Income Statement for year-ended Dec 31 (\$000s)

	<u>Year 1</u>	<u>Year 2</u>
Sales	4,969,100	5,157,600
COGS	2,036,000	2,420,700
SG&A	2,390,600	2,532,400
Depreciation	279,000	246,600
Amortization of Intangibles	<u>180,100</u>	<u>176,100</u>
Operating Income (Loss)	83,400	-218,200
Interest Expense	<u>116,500</u>	<u>78,200</u>
Income Before Tax	-33,100	-296,400
Income Tax Expense	<u>45,400</u>	<u>-56,100</u>
Net Income	-78,500	-240,300

Referring to the Blockbuster financial statements, what is the change in ROE from Year 1 to Year 2?

$$(\Delta ROE = ROE_2 - ROE_1)$$

- A) -4.80%
- B) -4.18%
- C) -2.87%
- D) -1.20%
- E) -1.17%

Answer: C

Explanation: C) $ROE = \frac{\text{Net Income After Tax}}{\text{Common Equity}}$

$$ROE \text{ Year 1} = \frac{-\$78,500}{\$6,008,400} = -1.31\%$$

$$ROE \text{ Year 2} = \frac{-\$240,300}{\$5,748,700} = -4.18\%$$

$$\text{Change} = -4.18\% - -1.31\% = -2.87\%$$

Net Income	-78,500	-240,300

Referring to the Blockbuster financial statements, which of the following ratios decreased from Year 1 to Year 2:

- I. Equity Multiplier
 - II. Net Profit Margin
 - III. Total Asset Turnover
- A) I
 B) II
 C) III
 D) I and II
 E) II and III

Answer: D

Explanation: D) Equity Multiplier = $\frac{\text{Total Assets}}{\text{Common Equity}}$

Net Profit Margin = $\frac{\text{Net Income After Tax}}{\text{Sales}}$

Total Asset Turnover = $\frac{\text{Sales}}{\text{Total Assets}}$

	Year 1	Year 2	Change
Multiplier	= 8,548,900 / 6,008,400 = 1.42	= 7,752,400 / 5,748,700 = 1.35	-0.07
NPM	= - \$78,500/\$4,969,100 = -1.58%	= -240,300 / 5,157,600 = -4.66%	-3.08%
TAT	= 4,969,100 / 8,548,900 = 0.58	= 5,157,600 / 7,752,400 = 0.67	+0.09

Income Tax Expense	<u>45,400</u>	<u>-56,100</u>
Net Income	-78,500	-240,300

Referring to the Blockbuster financial statements, what is the change in Gross Margin from Year 1 to Year 2? ($\Delta GM = GM_2 - GM_1$)

- A) -7.54%
- B) -5.96%
- C) -2.28%
- D) 5.96%
- E) 7.54%

Answer: B

Explanation: B) Gross Margin = $\frac{\text{Sales} - \text{COGS}}{\text{Sales}}$

$$\text{Gross Margin Year 1} = \frac{(4,969 - 2,036)}{4,969} = 0.5903$$

$$\text{Gross Margin Year 2} = \frac{(5,158 - 2,421)}{5,158} = 0.5307$$

$$\text{Change} = 0.5307 - 0.5903 = -5.96\%$$

Income Tax Expense	<u>45,400</u>	<u>-56,100</u>
Net Income	-78,500	-240,300

Referring to the Blockbuster financial statements, what is the most important underlying reason for the change in ROE?

- A) Decrease in cost of goods sold
- B) Increase in debt caused the debt/equity ratio to rise
- C) Increase in sales resulted in an increase in product returns which caused inventory turnover to decline
- D) Increase in cost of goods sold caused a big drop in gross margin
- E) Decrease in debt

Answer: D

Explanation: D) Cost of goods sold rises from Year 1 to Year 2. Debt falls—it does not rise. Inventory turnover improves from Year 1 (8.4) to Year 2 (11.9). Gross margin falls substantially due to an increase in cost of goods sold. Debt declines (as measured by the equity multiplier). The decline is quite small. Had ROA remained constant at the Year 1 level (-0.92%), the decline in leverage would have caused an increase in ROE from -1.3% to -1.24%.

Pre-Tax Income	198,013	256,600
Income Tax	75,049	94,947
Net Income	122,964	161,653
Shares outstanding	36,902	36,140
Earnings per share	\$3.33	\$4.47
Dividends per common share	\$0.80	\$0.82

Referring to the Molson Coors financial statements, did ROE rise or fall from Year 1 to Year 2?

A) Rise

B) Fall

Answer: A

Explanation: A) $ROE (\text{Year 1}) = \frac{\text{Net Income}}{\text{Equity}} = \frac{\$122,964}{\$951,312} = 12.9\%$

$ROE (\text{Year 2}) = \frac{\$161,653}{\$981,851} = 16.5\%$

ROE rose from Year 1 to Year 2.

EBIT	58.2	53.9
Interest Expense	<u>7.3</u>	<u>7.9</u>
Earnings before Income Tax	50.9	46.0
Income Taxes	<u>17.3</u>	<u>14.8</u>
Net Income	<u><u>33.6</u></u>	<u><u>31.2</u></u>

Referring to the CFM Majestic financial statements, which is the bigger or more important determinant of the change in ROE?

A) ROA

B) The Equity Multiplier

Answer: A

Explanation: A) ROA is the more important force acting on the decrease in ROE. 1 + D/E stayed constant during the two years, but what happened was our income went down and our assets went up (i.e. we are not being as efficient with our assets), therefore ROA is the bigger factor.

Referring to the CFM Majestic financial statements, What is Net Profit Margin in Year 1?

- A) 5.0%
- B) 6.6%
- C) 7.5%
- D) 8.8%
- E) 9.1%

Answer: D

Explanation: D) Net Profit Margin = $\frac{\text{Profit}}{\text{Sales}} = \frac{33.6}{381.9} = 8.8\%$

Referring to the CFM Majestic financial statements, is the change between Year 1 and Year 2 in Total Asset Turnover important in explaining the change in ROA?

A) No

B) Yes

Answer: A

Explanation: A) Total Asset Turnover (TAT) didn't change very much. The big change is the decline in the net profit margin, which caused a decline in ROA.

Diff: 1

Section: 3

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

46)

Income Statement
CFM Majestic Inc.
Years 1 & 2 (\$000,000s)

	<u>Year 1</u>	<u>Year 2</u>
Sales	381.9	416.3
COGS	244.9	278.9
SG&A	59.7	63.8

Earnings before Income Tax	50.9	46.0
Income Taxes	<u>17.3</u>	<u>14.8</u>
Net Income	<u><u>33.6</u></u>	<u><u>31.2</u></u>

Referring to the CFM Majestic financial statements, pick the most informative explanation for why ROA fell.

- A) ROA fell because both gross margin fell and Selling, General & Admin expenses as a percentage of sales fell.
- B) ROA fell because Total Asset Turnover fell.
- C) ROA fell because the Equity Multiplier fell and because Cost of Goods Sold over Sales rose.
- D) ROA fell because Net Income grew more slowly than Total Assets.
- E) ROA fell mainly because gross margin fell.

Answer: E

Explanation: E) ROA fell mostly because of the decline in gross margin. The company had a small increase in sales but the COGS went up a lot. Gross margin fell from 35.87% to 33.01%. SGA/Sales did fall, but that causes ROA to increase. We observed a decrease in ROA.

Total asset turnover declines by only a small amount. It isn't the main cause of the reduction in ROA and ROE.

The ROA is not dependent on the equity multiplier.

	Year 6	Industry Avg
Net Profit Margin		8.2%
Total Asset Turnover		1.64
ROA		13.4%
Equity Multiplier		1.42
ROE		19%

Referring to the financial statements for Tootsie Roll, what amount of leverage (i.e. debt-to-equity) would Tootsie need to make its year Year 6 return on equity equal (ROE) to the industry average ROE? (Round to initial ratios to nearest percentage.)

- A) 0.3456
- B) 0.9200
- C) 1.1333
- D) 1.4200
- E) 1.7632

Answer: A

Explanation: A) First, compute Tootsie's ROA:

$$\text{ROA} = \frac{\text{Net Income After Tax}}{\text{Total Assets}}$$

$$\text{ROA} = \frac{22,556}{159,702} = 14.12\%$$

$$\text{ROE} = \text{ROA} \times \left(1 + \frac{\text{D}}{\text{E}}\right)$$

$$\frac{\text{D}}{\text{E}} = \frac{\text{ROE(Industry)}}{\text{ROA(Tootsie)}} - 1$$

$$\frac{\text{D}}{\text{E}} = \frac{19}{14.12} - 1 = 0.3456$$

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

53) Which of the following is TRUE about the gross profit margin?

I. It is equal to price minus marginal costs

II. It reflects a retailer's average markup on its products

III. It excludes fixed costs

A) I and II

B) I and III

C) II and III

D) I, II and III

Answer: D

Explanation: D) The gross profit margin is sales minus cost of goods sold over sales. Cost of goods sold is a good approximation for marginal cost. The markup is the difference between the price of a good and its cost. Cost of goods sold does not include depreciation, which is average fixed costs.

54) The current ratio is used by _____ to assess _____.

- A) bankers; the availability of short-term collateral
- B) managers; short-term profitability
- C) managers; short-term asset management
- D) bankers; solvency

Answer: A

Explanation: A) The liquidity ratios examine how able a firm is to pay its current liabilities. The current ratio compares current assets to current liabilities. In a sense, current liabilities have a claim against current assets. Any excess current assets is collateral available to back new loans.

Debt	57.100	17.610	2.320
Cash	8.100	0.913	5.610
Sales Revenues	431.870	68.440	88.915
EPS	4.75	4.32	3.37
BVPS	19.87	22.94	27.70
P/E		12.0	24.6
M/B	2.9		3.0

All values (except per share values and ratios) in billions.

Using market ratios, which stock looks overpriced (relative to the other two)?

- A) Walmart
- B) Target
- C) Costco

Answer: C

Explanation: C) For Walmart P/E = 12.21 and for Target M/B = \$2.27. Thus, Costco has the highest P/E and M/B ratios. It is the most overvalued stock.

LO5: Evaluate Company Performance Using DuPont Ratio

1) The DuPont analysis calculates ROE as the product of

- A) leverage, market value, and turnover.
- B) margin, turnover, and leverage.
- C) profitability, liquidity, and leverage.
- D) activity, leverage, and debt.
- E) margin, profitability, and leverage.

Answer: B

Explanation: B) $ROE = \text{Net Profit Margin} \times \text{Total Asset Turnover} \times \text{Equity Multiplier}$

Diff: 1

Section: 5

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

2) When would the "return on equity" equal the "return on assets"?

- A) Whenever the debt to equity ratio is one
- B) Whenever the debt ratio is zero
- C) Whenever a firm has positive net worth
- D) Whenever the firm has positive net worth and positive net income

Answer: B

Explanation: B) If you recall from the section on the Du Pont Analysis,

$$ROE = ROA \times \left(1 + \frac{\text{Debt}}{\text{Equity}}\right)$$

So, in order for $ROE = ROA$ the debt to equity ratio must equal zero. Debt in the Du Pont system is equal to total liabilities. The debt ratio is defined as total liabilities over total assets. If the debt ratio is zero, then debt in the Du Pont system is zero and $D/E = 0$.

Diff: 1

Section: 5

AACSB: Analytical Skills

Learning Outcome: F-02: Analyze the major types of financial statements

3) All else held constant, an increase in leverage should increase the ROE.

Answer: TRUE

Explanation: If you recall from the section on the Du Pont Analysis,

$$ROE = ROA \times \left(1 + \frac{\text{Debt}}{\text{Equity}}\right)$$

If D/E increases and ROA is unchanged, then ROE will rise.

- E) -0.11

Answer: A

Explanation: A) Equity Multiplier = $\frac{\text{Total Assets}}{\text{Common Equity}}$

	Industry	Year 6	Difference
Multiplier	= 1.42	= 159,702 / 129,845 = 1.23	-0.19

6) **Tootsie Roll Industries Inc.**
Income Statement
As of December 31, Year 6 (\$000s)

	Year 6
Net sales	194,299
COGS	103,205
SG&A	54,329
EBIT	36,765
Interest expense	612
Other income (expenses), net	966
Income before income taxes	37,119
Income taxes	14,563
Net Income	22,556
Total Cash dividends	12,316
Shares Outstanding	9,645
Average price per share (4th Q)	\$36.50

Selected Financial Ratios

	Year 6	Industry Avg
Net Profit Margin		8.2%
Total Asset Turnover		1.64
ROA		13.4%
Equity Multiplier		1.42
ROE		19%

Referring to the financial statements for Tootsie Roll and based on the Du Pont analysis, what main reasons explain the difference(s) between Tootsie's ROE and the industry average ROE?

- I. Tootsie does not have enough leverage.
- II. Tootsie has more leverage than the industry.
- III. Tootsie manages their assets poorly - low total asset turnover.
- IV. Tootsie manages their assets poorly - high total asset turnover.

- A) I
- B) III
- C) I and III
- D) I or IV
- E) II or III

Answer: C

Explanation: C) Tootsie has a lower amount of leverage than the industry. Tootsie has a much higher net profit margin than the industry (12% v. 8.2%), but this advantage is offset by poor asset management. The total asset turnover for Tootsie is 1.22 but it is 1.64 for the industry. Despite the poor asset management, Tootsie has a higher ROA than the industry. But the ROA would be even higher were it able to take advantage of its higher profitability (net profit margin) through greater asset management. Thus, total asset turnover and leverage both explain Tootsie's poor ROE relative to the industry.

7) The Du Pont equation reveals that ROE results from a trade-off between margin, volume and leverage.

Answer: TRUE

Explanation: The Du Pont ratio shows that ROE equals the product of net profit margin, total asset turnover and $(1 + D/E)$.

8) Which of the following is a TRUE statement about the Du Pont equation?

I. It is a mathematical identity.

II. It provides a causal explanation for changes (or differences) in ROE.

III. It is used to analyze chemical companies.

A) I only

B) II only

C) III only

D) I and II

E) II and III

Answer: D

Explanation: D) The Du Pont ratio shows that ROE equals the product of net profit margin, total asset turnover and $(1 + D/E)$.

LO6: Integrate Ratios Together to Perform Company Analysis

1) All of the following are part of a financial analysis EXCEPT

- A) examining the strengths and weaknesses of the firm.
- B) performing a means-end analysis.
- C) calculating the DuPont ratio.
- D) analyzing the competition.
- E) performing an industry analysis.

Answer: B

Explanation: B) Financial analysis of a firm includes analyzing the economy, the industry, the competitors, and the strengths and weaknesses of the firm.

2) Ratio interaction refers to

- A) using multiple ratios to make a decision.
- B) the way ratios are affected by managerial decisions.
- C) how ratios affect managerial decisions.
- D) the effect one ratio has on another.
- E) when a ratio raises a red flag for analysts.

Answer: D

Explanation: D) Ratio interaction refers to the effect one ratio has on another.
