OBJ:	4	TOP:	Inorganic chemistry

- 18. Which of the following is not true of water?
  - a. Water is the most abundant organic compound in the body.
  - b. Water is found both in and around the cells of the body.
  - c. Water is the solvent in which most other compounds are dissolved.
  - d. All of the above are true of water.

ANS: A OBJ: 5	DIF: TOP:	Memorization Water	REF:	p. 27

- 19. In a dehydration synthesis reaction:
  - a. water is a reactant
  - b. water is a product
  - c. a large molecule is broken down into a smaller one
  - d. both a and c above

ANS:	В	DIF:	Memorization	REF:	p. 27
OBJ:	5	TOP:	Water		_

### 20. In a dehydration synthesis reaction:

- a. hydrogen and oxygen are removed from the reactants
- b. water is added to the reactants
- c. water is broken down into hydrogen and oxygen
- d. both a and c above

ANS: A	DIF:	Memorization	REF:	p. 27
OBJ: 5	TOP:	Water		_

# 21. In a hydrolysis reaction:

- a. water is a product
- b. water is a reactant
- c. water is broken down into hydrogen and oxygen
- d. the product is larger than either reactant
- ANS: BDIF: MemorizationREF: p. 27OBJ: 5TOP: Water

#### 22. Which of the following statements is true?

- a. The process of hydrolysis is used to build a larger molecule from smaller molecules.
- b. Water is an end product of a hydrolysis reaction.
- c. The process of dehydration synthesis is used to build a larger molecule from smaller molecules.
- d. Water is a reactant in a dehydration synthesis reaction.

ANS: C	DIF:	Memorization	REF:	p. 27
OBJ: 5	TOP:	Water		

- 23. Which is not true of the following chemical equation?  $K^+ + Cl^- \rightarrow KCl$ 
  - a. The equation indicates that there are two reactants.
  - b. The equation indicates that there is one product.
  - c. The equation indicates that the reaction occurs in both directions equally.

#### d. All of the above are true.
