### **SHORT ANSWER**

1. Why is self-awareness essential to being an effective manager?

### ANS:

With self-awareness, you can put yourself in a position to employ your natural behaviors and enjoy a life of fewer struggles and more satisfaction.

PTS: 1 DIF: Easy NAT: BUSPROG: Reflective Thinking

LOC: DISC: Leadership Principles TOP: Know Yourself

KEY: Bloom's: Knowledge

2. In a short summary, what is the Whole Brain Model and who developed it?

# ANS:

The Whole Brain Model is a way to categorize how a person thinks, and it breaks this into 4 quadrants. The 4 quadrants consider left and right brain thinking, and also consider conceptual versus experiential thinking. The model was developed by Ned Hermann.

KEY: Bloom's: Comprehension

3. What would someone who has an ESTJ personality be like?

# ANS:

This person would be orderly, structured, practical, and a good administrator or supervisor. Students' answers may include more details.

PTS: 1 DIF: Challenging NAT: BUSPROG: Reflective Thinking LOC: DISC: Leadership Principles TOP: Key Individual Differences

KEY: Bloom's: Synthesis

4. What did CEO of Steelcase, Jim Hackett, do that showed his integrity, and what was the result of his actions?

## ANS:

Jim recalled the use of less-fire retardant panels for use in walls. The less-resistant panels would technically be allowed per regulations in some locations, but Jim knew that this could cause safety problems anyway, so he recalled even though it cost Steelcase money. The result was that when the terrorist attacks on the Pentagon happened in 2001, the building burned much more slowly than if he allowed the less-resistant panels to have been sold.

## **ESSAY**

1. Explain what the Johari Window is.

ANS:

The Johari Window is a tool managers can use to move toward greater transparency and alignment with others. The 4 quadrants each represent a self-awareness window.

Quadrant 1: The "open" quadrant represents information known to the individual and is also known to others.

Quadrant 2: The "blind" quadrant includes things that are known about an individual by others but are unknown to the individual himself.

Quadrant 3: The "hidden" quadrant represents things that an individual knows about himself or herself but keeps hidden from others.

Quadrant 4: The "unknown" quadrant represents things that are unknown both to the individual and to others in the group.

PTS: 1 DIF: Challenging NAT: BUSPROG: Reflective Thinking LOC: DISC: Leadership Principles TOP: The Importance of Self-Awareness

KEY: Bloom's: Synthesis

2. Explain the Big Five Model of Personality.

## ANS:

The Big Five Model of Personality describe an individual's extraversion, agreeableness, conscientiousness, emotional stability and openness to experience.

- 1. Extraversion: The degree to which a person is outgoing
- 2. Agreeableness: The degree to which a person is able to get along with others by being good-natured, likeable, cooperative, forgiving, understanding, and trusting.
- 3. Conscientiousness: The degree to which a person is careful, organized, self-disciplined, responsible, dependable, persistent, and achievement oriented.
- 4: Emotional Stability: The degree to which a person is calm, enthusiastic, positive, and self-confident rather than moody, fearful, negative, or insecure.
- 5. Openness to Experience: The degree to which a person has a broad range of interests and is curious, imaginative, and willing to consider new ideas.

PTS: 1 DIF: Challenging NAT: BUSPROG: Reflective Thinking LOC: DISC: Leadership Principles TOP: Key Individual Differences

KEY: Bloom's: Analysis

3. Explain the Myers-Briggs Type Indicator Assessment.

### ANS:

The Myers-Briggs Type Indicator Assessment (MBTI) provides a way of measuring differences among individuals in their psychological preferences for how they interact with others and perceive the world. The assessment uses four pairs of attributes based on Jung's concepts to classify people according to different personality types:

- 1. Introversion versus extraversion: Extraverted people gain energy from being around others and introverted people gain energy by being alone to focus on personal thoughts.
- 2. Sensing versus intuition: Sensing people gather information though the five senses and intuitive people rely on less direct perceptions.
- 3. Thinking versus feeling: Feeling types rely on their sense of right and wrong, and thinking types rely on logic as they try to be rational.
- 4. Judging versus perceiving: Judging people like certainty and closure, whereas perceiving people like enjoy ambiguity and multitasking.
