

Chapter 02: Planning, Implementing, and Evaluating Marketing Strategies

1. Describe the process of strategic planning. How does this process help marketing managers?

AN Through the process of strategic planning, a company establishes an organizational mission and formulates goals, a corporate strategy, marketing objectives, and a marketing strategy. A market orientation should guide the process of strategic planning to ensure that a concern for customer satisfaction is an integral part of the entire company, leading to the development of successful marketing strategies and planning processes. The strategic planning process begins with the establishment or revision of an organization's mission and goals. The corporation and individual business units then develop strategies to achieve these goals. The company performs a detailed analysis of its strengths and weaknesses and identifies opportunities and threats within the external marketing environment. Next, each functional area of the organization (marketing, production, finance, human resources, etc.) establishes its own objectives and develops strategies to achieve them, which must support the organization's overall goals and mission and should be focused on market orientation.

2. How does a firm use a market opportunity to reach a particular target market?

AN Analysis of the marketing environment also includes identifying opportunities in the marketplace, which requires a solid understanding of the company's industry. When the right combination of circumstances and timing permits an organization to take action to reach a particular target market, a market opportunity exists. The SWOT analysis is used to assess an organization's strengths, weaknesses, opportunities, and threats. It is depicted as a four-cell matrix and shows how marketers must seek to convert weaknesses into strengths, threats into opportunities, and match internal strengths with external opportunities to develop competitive advantages. Strengths and weaknesses are internal factors that can influence an organization's ability to satisfy target markets. Strengths refer to competitive advantages, or core competencies, that give the company an advantage over other firms in meeting the needs of its target markets. Weaknesses are limitations a company faces in developing or implementing a marketing strategy.

3. In what ways does having a mission statement help an organization achieve its goals?

AN Once an organization has assessed its resources and opportunities, it can begin to establish goals and strategies to leverage them. The goals of any organization should derive from its mission statement, a long-term view, or vision, of what the organization wants to become. A well-formulated mission statement gives an organization a clear purpose and direction, distinguishes it from competitors, provides direction for strategic planning, and fosters a focus on customers. An organization's goals, which focus on desired results, guide the remainder of its planning efforts.

4. Compare and contrast corporate strategy and marketing strategy.

AN Corporate strategy determines the means for utilizing resources in the functional areas of marketing, production, finance, research and development, and human resources to achieve the organization's goals. A corporate strategy outlines the scope of the business and such considerations as resource deployment, competitive advantages, and overall coordination of functional areas. On the other hand, a marketing strategy involves the selection of a target market and the creation of a marketing mix that will satisfy the needs of target market members. A marketing strategy articulates the best use of the company's resources to accomplish its marketing objectives. Selecting an appropriate target market may be the most important decision a company makes in the strategic planning process and is a key to strategic success. The target market must be chosen before the organization can adapt its marketing mix to meet the customers' needs and preferences.

Chapter 02: Planning, Implementing, and Evaluating Marketing Strategies

5. Define the four product categories used in the Boston Consulting Group (BCG) product-portfolio analysis.

AN One of the most helpful tools for a marketer is the market growth/market share matrix, developed by the Boston Consulting Group (BCG). This approach is based on the philosophy that a product's market growth rate and its market share are important considerations in determining marketing strategy. The BCG matrix enables a strategic planner to :

- classify a company's products into four basic types: stars, cash cows, dogs, and question marks. *Stars* are products with a dominant share of the market and good prospects for growth. However, they use more cash than they generate in order to finance growth, add capacity, and increase market share. *Cash cows* have a dominant share of the market, but low prospects for growth. They typically generate more cash than is required to maintain market share. *Dogs* have a subordinate share of the market and low prospects for growth. Dogs are often found in established markets. *Question marks*, sometimes called "problem children," have a small share of a growing market and require a large amount of cash to build market share.

6. Describe the two major methods for evaluating the actual performance of marketing strategies.

AN The principal means by which a marketer can gauge whether a marketing strategy has been effective in achieving SW objectives is by analyzing the actual performance of the marketing strategy. Sales analysis uses sales figures to ER evaluate a firm's current performance. It is a common method of evaluation because sales data are readily available, at :

- least in aggregate form, and can reflect the target market's reactions to a marketing mix. If sales spike after a particular marketing mix is implemented, marketers can be reasonably certain that the marketing mix was effective at reaching the target audience. Information gleaned from sales data alone is not sufficient, however. To be useful, marketers must compare current sales data with forecasted sales, industry sales, specific competitors' sales, and the costs incurred from marketing efforts to achieve the sales volume. Although sales analysis is critical for evaluating the performance of a marketing strategy, it provides only a partial picture. A marketing strategy that successfully generates sales may nevertheless be deemed ineffective if it is extremely costly. A firm must take into account the marketing costs associated with a strategy to gain a complete understanding of its effectiveness at achieving a desired sales level. Marketing cost analysis breaks down and classifies costs to determine which are associated with specific marketing efforts. Comparing costs of previous marketing activities with results allows a marketer to allocate the firm's marketing resources better in the future. A company that understands and manages its costs appropriately has a competitive advantage.

7. Describe the two major components of marketing strategy. What should marketing managers consider when developing marketing strategy?

AN A marketing strategy is the selection of a target market and the creation of a marketing mix that will satisfy the needs SW of target market members. A marketing strategy articulates the best use of the company's resources to achieve its ER marketing objectives. A target market is a specific group of customers on whom an organization focuses its marketing :

- efforts. When exploring possible target markets, marketing managers try to evaluate how entering them would affect the firm's sales, costs, and profits. In addition, they should determine if satisfying those needs is consistent with the firm's overall mission and objectives. Once a target market is selected, it is used as the basis for creating a marketing mix to satisfy the needs of that market. The marketing mix is composed of four marketing activities—product, pricing, distribution, and promotion—that a firm can control to meet the needs of customers within its target market. All marketing mix decisions should be consistent with the business-unit and corporate strategies. Also, marketing mix decisions should be flexible and permit the firm to alter the marketing mix in response to changes in market conditions, competition, and customer needs. At the marketing mix level, a firm can detail how it will achieve a competitive advantage. To gain an advantage a firm must do something better than its competitors. Ultimately, it is important for the firm to achieve a sustainable competitive advantage, one that the competition cannot copy in the foreseeable future.

Chapter 02: Planning, Implementing, and Evaluating Marketing Strategies

8. Discuss the creation of a marketing plan. What are the major components of a marketing plan?

AN A marketing plan is a written document that specifies the marketing activities to be performed to implement and *SW* evaluate the organization's marketing strategies. The first component of the marketing plan is the executive summary, *ER* which provides an overview of the entire plan so that readers can quickly identify the key issues and their roles in the : planning and implementation processes. The executive summary includes an introduction, an explanation of the major aspects of the plan, and a statement about costs.

The next component of the marketing plan is the environmental analysis, which supplies information about the company's current situation with respect to the marketing environment, the target market, and the firm's current objectives and performance. The environmental analysis includes an assessment of all the environmental factors—competitive, economic, political, legal, regulatory, technological, and sociocultural—that can affect marketing activities. The analysis then examines the current needs of the organization's target markets. In the final section of the environmental analysis, the company evaluates its marketing objectives and performance to ensure that objectives are consistent with the changing marketing environment.

The next component of the marketing plan is the SWOT analysis (strengths, weaknesses, opportunities, and threats), which utilizes the information gathered in the environmental analysis. The marketing objectives section of the marketing plan states what the company wants to accomplish through marketing activities, using the SWOT analysis as a guide to where the firm stands in the market. The marketing strategies component outlines how the firm plans to achieve its marketing objectives and discusses the company's target market selection(s) and marketing mix.

The marketing implementation component of the plan outlines how marketing strategies will be executed.

Finally, the performance evaluation establishes the standards for how results will be measured and evaluated, and what actions the company should take to reduce the differences between planned and actual performance.

9. Discuss the different ways of organizing the marketing unit.

AN The structure and relationships of a marketing unit, including establishing lines of authority and communication that *SW* connect and coordinate individuals, strongly affect marketing activities. To organize a marketing unit, firms must first *ER* decide whether operations should be centralized or decentralized, a choice that directly affects marketing decision : making and strategy.

In a centralized organization, top-level managers delegate little authority to lower levels. In centralized organizations, marketing decisions are made at the top levels. However, centralized decision making may prove ineffective in firms that must respond quickly to fluctuations in customer demand. In these organizations, decentralized authority allows the company to adapt more rapidly to customer needs.

In a decentralized organization, decision-making authority is delegated as far down the chain of command as possible. How effectively a company's marketing management can implement marketing strategies also depends on how the marketing unit is organized. Organizing marketing activities to align with the overall strategic marketing approach enhances organizational efficiency and performance. A marketing department should clearly outline the hierarchical relationships between personnel and who is responsible for performing certain activities and making decisions.

10. Discuss how a firm's orientation is related to the development of its strategic plan.

AN Through the process of strategic planning, a company establishes an organizational mission and formulates goals, a *SW* corporate strategy, marketing objectives, and a marketing strategy. A market orientation should guide the process of *ER* strategic planning to ensure that a concern for customer satisfaction is an integral part of the entire company, leading : to the development of successful marketing strategies and planning processes.

68. Scenario 2.1

Use the following to answer the questions.

Southwest Airlines has a history of being able to retain its employees due to the atmosphere and culture of the company. Employees have been known to dress up in costume on an airplane, engage in "games" with the passengers, and generally provide a fun atmosphere for traveling. While other airlines have low rates of customer satisfaction, Southwest tends to maintain a high rating with its customers. Recent gas price hikes have caused most airlines to charge for checked luggage and to fill every flight to its maximum, adding to the negative experience of airline travel. Southwest keeps its costs low through several methods, one being that they do not serve meals on flights, or provide pre-boarding passes. The typical flight is two hours or less and occurs between several selected cities rather than flying to practically anywhere in the country. Southwest is known for its low fares, its dependability, and its on-time flights.

Refer to Scenario 2.1. In Southwest Airlines' SWOT analysis, the rising gas prices are a(n) _____, while the fact that other airlines are charging for all checked baggage may create a(n) _____.

- a. threat; strength
- b. weakness; strength

Recent gas price hikes have caused most airlines to charge for checked luggage and to fill every flight to its maximum, adding to the negative experience of airline travel. Southwest keeps its costs low through several methods, one being that they do not serve meals on flights, or provide pre-boarding passes. The typical flight is two hours or less and occurs between several selected cities rather than flying to practically anywhere in the country. Southwest is known for its low fares, its dependability, and its on-time flights.

Refer to Scenario 2.1. The fact that Southwest Airlines has a history of being able to retain its employees is a(n) _____ in its SWOT analysis. This low turnover creates more knowledgeable and satisfied employees, a potential _____.

- a. weakness; opportunity
- b. strength; competitive advantage
- c. threat; market opportunity
- d. opportunity; competitive advantage
- e. strength; market opportunity

ANSWER: b

116. Trek Bicycles, Inc. is a manufacturer of bicycles and sells its bikes to retail outlets that serve the consumer market. Trek bicycles are priced at \$300 and over and are typically sold to consumers who are recreational riders or those aspiring to compete in amateur cycling or triathlon events. Trek has enjoyed a steady stream of revenue from its line of road bicycles, which are more traditional, multispeed bicycles for those who enjoy long rides on city or rural roads. Sales of road bikes are relatively stable, and Trek does little to market the bikes to consumers since they have a dominant share of the market. However, hybrid bikes represent a growing segment as younger consumers prefer the upright riding position of the bikes. They can also be utilized for either road or mountain biking. Trek is supporting the hybrid line of bikes with extensive advertising in specialty magazines as well as social media marketing. Trek believes the category of hybrid bikes is growing, but their market position is not as strong as other manufacturers, such as Cannondale. Using the Boston Consulting Group’s Growth Share Matrix, road bicycles would be categorized as _____ while hybrid bikes would fall into the _____ category.

121. Buddy's Smokin' Bar-B-Que restaurant opened in 2014 and struggled to build a customer base for lunch, dinner, or event catering options. When the owners were planning the restaurant, they had projected they would sell 60 to 80 lunches daily with an average lunch price of \$8.00. They believed that dinner business would be higher and that they would also benefit from their approved liquor license, which could generate between 100 and 120 plates per day at \$12 per customer. However, the actual daily lunch and dinner totals were much less and the owners were barely breaking even. They wondered if they should close the business. However, Buddy's restaurant began an aggressive marketing effort, offered lunch and dinner specials, and promoted the restaurant as a family-friendly place where everyone could enjoy fresh, smoked bar-b-que meats. As a result of their marketing efforts, the restaurant is selling out of its product almost daily and has built a takeout business as well. They are selling 100 lunches daily with an average price of \$10 and approximately 200 dinner plates at \$15. The restaurant is pleased with the revenue stream they're generating from the restaurant and are considering opening a second location or adding space to accommodate more customers at the existing location. Using the data regarding number of plates sold and the average order amount generated, what kind of analysis can the owners of the restaurant perform to assist them in understanding their business opportunities?

- a. sales analysis
