70. John, a law enforcement official, monitors Kelsey's Internet activities—e-mail and website visits—to gain access to her personal financial data and student information. This may violate Kelsey's right to

- a. privileges and immunities.
- b. privacy.
- c. free speech.
- d. free exercise.

ANSWER: b

Essay

71. Kim operates Kim's Fruits & Vegetables, a small market stocked entirely with produce grown on her adjacent farm. Under what clause of the Constitution can the federal government regulate Kim's activities? What is Kim's best argument against federal regulation of her farm and business?

ANSWER: Under the commerce clause, at least in theory, Congress has the power to regulate any activity—interstate or intrastate—that affects interstate commerce. Thus, under that clause, it could be argued that the farmer's growing and selling of produce is subject to federal regulation because these activities affect interstate commerce.

The farmer-vendor's best argument against federal regulation of her farm and business in this problem might be that in her case these activities and their effects are purely local. But because of the economic character of these activities, there is an effect on interstate commerce, however minimal and despite their local character. For example, customers who buy produce from the market are not likely to purchase the same goods from stock traded in interstate commerce. Thus, it is unlikely that a court would accept this argument.

72. The Wisconsin state legislature enacts a statute that prohibits the advertising of video games "because the games might be harmful to minors." Despite this new statute, the president of x-Games, Inc., orders x-Game marketers to place ads in various media. When an x-Game ad appears on YUTV, a local television station, x-Games and YUTV are charged with violating the statute. What is the defendants' best defense against a conviction?

ANSWER: x-Games and YUTV cannot be convicted because a state legislature cannot enact a statute that restricts commercial speech (in this situation, marketing video games) to this extent.

The First Amendment protects commercial speech. Because commercial speech does not receive as much protection as noncommercial speech, however, states can place some restraints on the former. For example, to protect consumers, a state may ban certain kinds of marketing practices, such as deceptive or misleading advertising. Generally, a restriction on commercial speech will be considered valid as long as it (1) seeks to implement a substantial government interest, (2) directly advances that interest, and (3) goes no further than necessary to accomplish the objective.

Here, the complete ban on ads for video games "because the games might be harmful to minors" is too restrictive: it goes too far in attempting to protect minors for an apparently unsubstantiated purpose.
