Match the following terms or phrases with the correct description or definition.

- | | |
|--|---|
| a. A classification system based on common ancestors, phylogenic relationships, and evolutionary changes. | b. Protein molecules which comprise the capsule around viral nucleic acids. |
| c. A condition of destruction of brain matter from pathogenic invasion. | d. A division of taxonomic hierarchy smaller than kingdom and larger than class. |
| e. Group of microbes which have ancient roots and similarities with unicellular and multicellular microbial organisms. | f. Viral particles which infect bacterial cells. |
| g. The study of all classes and types of prokaryotic organisms. | h. Group of organisms characterized by the presence of a nucleus within the cell structure. |
| i. A non-living pathogen which contains reverse transcriptase that synthesizes DNA from an RNA template. | j. The complete set of an organism's DNA, RNA, chromosomes, and genes. |
