- E) None of the above

18. Which of the following is not one of the Nine Fs of Entrepreneurial Success?

- A) Focused
- B) Frugal
- C) Flexible
- D) Frenetic**
- E) Fun

19. Which of the following is not one of the 10 Ds of Successful Entrepreneurs?

- A) Driven**
- B) Details
- C) Dedicated
- D) Distribute
- E) Dream

20. In entrepreneurship, luck is where _____ and opportunity meet.

- A) Intelligence
- B) Fortune
- C) Strategy
- D) Focus
- E) Preparation**

21. Which of the following is not a characteristic of most entrepreneurial ideas?
- A) **They are unique**
 - B) They offer improved performance
 - C) They offer lower pricing
 - D) They offer higher quality
 - E) They offer better service
22. The best would-be entrepreneur will have a track record of:
- A) Working consistently at one company
 - B) **Increasing sales and profits**
 - C) Managing multiple employees
 - D) Work in numerous industries
 - E) Strong relationships with managers
23. Commonly outsourced responsibilities include all of the following except:
- A) Payroll
 - B) Accounting
 - C) Legal work
 - D) **Customer service**
 - E) Janitorial Services
24. The situation that arises when an entrepreneur is reliant on his or her company for a salary and has most of his or her personal net worth tied up in the company is called:
- A) Sweat equity
 - B) Venture capital
 - C) **Double jeopardy**
 - D) Factoring
 - E) Locus of control
25. A \$150,000 dollar investment in a company that yielded a \$30,000 dividend in the first year would have achieved which of the following returns on investment?
- A) 2%
 - B) 5%
 - C) 15%
 - D) **20%**
 - E) 30%
26. Which of the following is not one of the global conditions increasing the rate of change in business?
- A) **Managerial specialization and layering.**
 - B) The industrial sector's reliance on advanced knowledge.
 - C) Advancements in communications.
 - D) Changes in government regulations.
 - E) All of the above

27. Approximately 50% of Inc. 500 companies make a net profit margin of ...
- A) 16% or more
 - B) 15%
 - C) 5% or less**
 - D) 13%
28. Often start-ups can reduce overhead by using outside firms for...
- A) Payroll
 - B) Accounting
 - C) Advertising
 - D) All of the above**
 - E) None of the above
29. To reduce the cost of office space you may be able to convince a landlord to...
- A) Reduce rent
 - B) Defer rent payments for a period of time
 - C) Allow subletting of unused space
 - D) B and C
 - E) A and B**
30. The factors that give birth to a new enterprise and influence its development can be categorized as
- A) Innovation, Triggering, Environmental, Growth
 - B) Sociological, Environmental, Innovation, Personal
 - C) Personal, Sociological Organizational, Environmental**
 - D) Innovation, Triggering Event, Implementation, Growth
31. One of the biggest misconceptions about an idea for a new business is that
- A) It must be technology related
 - B) It must be unique**
 - C) It must be patentable
 - D) None of the above

Open Ended

1. Give several examples of triggering events that give birth to a new organization.
 - Job dissatisfaction
 - Loss of job
 - Dissatisfaction with current level of income
 - Desire to be independent
2. What are the stages described in the model of the entrepreneurial process? What are the factors that give birth to a new enterprise and influence how it develops from an idea to a viable enterprise?
 - Stages: innovation => triggering event => implementation => growth

- Factors: personal, sociological, organizational, and environmental
3. What are some of the sociological reasons that starting a company becomes more risky or difficult as people grow older?
 - When one has been in an industry a long time, that person knows so many pitfalls that he or she may become pessimistic about the chance of success of any new venture.
 - Young people, on the contrary, are usually optimistic about future and have the energy to implement their ideas, regardless of the current conditions.
 - A beginner's mind looks at situations from a new perspective.
 4. What contacts will you need as an entrepreneur?
 - Customers
 - Suppliers
 - Investors
 - Bankers
 - Accountants
 - Lawyers
 5. Explain the rationale behind the statement, “A first class team with a second class idea is better than a second class team with a first class idea.”
 - If you have identified an excellent opportunity but your team lacks the experience to implement it, you will not be able to fulfill the idea’s potential.
 - The crucial ingredients for entrepreneurial success are: a superb entrepreneur with a first-rate management team and an excellent market opportunity.
 - Entrepreneurship is not a matter of luck, but of an ability to combine one’s experience with one’s knowledge and to bring an idea to life.
 6. Why do you suppose the authors say that in entrepreneurship, “Ideas are a dime a dozen,”? What does this statement imply about an idea’s importance to a successful business?
 - Almost any idea that a would-be entrepreneur might have has also occurred to others.
 - A good idea in itself is not guaranteed to become a profitable venture.
 - Developing the idea, implementing it, and building a business are the important aspects of entrepreneurship.
 7. Explain the benefits and drawbacks of debt and equity financing, respectively.
 - Debt does not require an entrepreneur to give up any ownership stake in the business. However, debt does require the business to pay current interest and eventually repay the principal.
 - Equity financing compels the founder to relinquish a portion of ownership in the business, but does not demand repayment or even a dividend.
 8. Describe the likely progression of financing for a startup that achieves an IPO.
 - The entrepreneurs develop a prototype with personal savings, contributions from friends and family, and sweat equity.
 - Then a wealthy investor invests some personal money in return for equity.

- After the company begins generating revenue, it may be able to secure a bank line of credit by leveraging its inventory and accounts receivable.
 - If the company is growing quickly in a large market, it may be able to raise capital from a formal venture capital firm in return for equity.
 - Further expansion capital may come from additional rounds of venture capital founding or from a public stock offering.
9. What is ‘free cash flow’ and why is it such a critical factor for a growing business?
- The ability to generate a positive free cash flow indicates that the business can sustain its operations and purchase the assets necessary to keep the company on its growth trajectory.
 - If a venture does not generate enough cash to sustain its growth, it may self-destruct.
 - The inability to generate free cash flow forces a firm to either dive more deeply into debt or dilute the owner’s share in the venture in order for the business to finance further growth.
10. The three crucial components of a successful venture are the opportunity, the entrepreneur/management team, and the resources needed to start the company. Explain the interrelation of these items.
- The crucial driving force of any new venture is the lead entrepreneur and the founding management team.
 - In entrepreneurship, success is a question of recognizing a good opportunity and having the skills to convert that opportunity into a thriving business.
 - The ability to find the necessary resources and to use them efficiently is the metaphoric chain linking the entrepreneur and the opportunity.
11. How do salary and return on investment, for the founding entrepreneur, factor into the regular operations of a startup?
- A wage expenses for the founder and any family members working for the business should be considered in profitability calculations, regardless of whether or not cash has actually been paid to them.
 - Any salary earned but not paid out by the business should be recorded as deferred compensation to be paid at a later date.
 - The entrepreneur’s investment in the business should earn a reasonable return to be paid as a dividend, or as capital gains, when the business is sold.
12. Discuss some issues around being secretive about your business idea
- It complicates evaluating the idea for lack of others input
 - It can prevent a poor idea from being abandoned before it absorbs too many resources
 - It can let an excellent idea die for the entrepreneurs lack of confidence
 - The idea itself is less critical than the ability to execute on it.
13. How can an entrepreneur’s location improve chances for success?
- Locating in a hotbed of entrepreneurial activity can make role models more accessible, and lower barriers to starting.

- Places like Silicon Valley for tech start-ups have a high concentration of needed resources for high-potential start-ups, from money to talent.
- Institutions like MIT and Babson College generate many entrepreneurs. So many so that whereas other schools have entrepreneurship clubs, these schools effectively are giant entrepreneurship clubs.

14. Discuss the impact that greater family responsibilities may have on the decision to become and entrepreneurs.

- Clearly the risk is higher in terms of the financial and personal costs
- Such entrepreneurs may wish to spend more time preparing themselves financially to go without income for some time
- Entrepreneurs may choose to start a venture on the side, confirm the existence of a market and initial viable business model, before putting more time and effort into the company.
- Entrepreneurs may choose to start companies with different business models, such as online companies, that enable them flexible work locations.

15. Describe the importance of identifying how much start-up capital you will need to reach a positive cash flow.

- Without an understand of an initial figure, and the key drivers of the figure, an entrepreneur risks failure by running out of money, or by giving away too much equity to raise funds and thereby failing to achieve a sufficient return on investment.
- New ventures must have the resources need to growth fast enough to a position where it can sustain itself on its own cash flow from operations. Insufficient cash early on could do irreparable damage a venture likelihood of success.

16. Discuss the importance of an entrepreneur calculating the sales revenue needed to ultimately generate an equivalent income level to their current job.

- More US businesses earn an average net margin of 5%, thus to gain an adequate return on investment, the entrepreneur may need revenues of 20x their present annual income. This number is important because as equity may become diluted, or debt levels are increased, this figure will increase.
- If financing methods cannot be rationalized with a growth model that will eventually yield the entrepreneurs desired return on investment, then the venture should be reconsidered.
