95) What is business ethics?

Answer: Answers will vary

Business ethics refers to principles and standards that define acceptable behaviour in business organizations. Within the context of an organization, ethics relate to an individual's or a work group's decisions that society evaluates as right or wrong.

96) Differentiate between the terms social responsibility and ethics.

Answer: Answers will vary

Although many people use the terms social responsibility and ethics interchangeably, they do not mean the same thing. Business ethics relate to an individual's or a work group's decisions that society evaluates as right or wrong, whereas social responsibility is a broader concept that concerns the impact of the entire business's activities on society.

97) Briefly summarize the Occupy Movement.

Answer: Answers will vary

The Occupy Movement can be described as a global protest against social and economic inequality. Protestors believe that global corporations (notably financial institutions and wealthy individuals) have an unfair influence in politics leading to economic and social problems that undermine democracy. The movement, which originated in New York, spread quickly throughout North America as protesters built camps in highly visible areas such as in public parks or in front of government buildings. Today, people in the movement claim they are still working on ending economic disparity and addressing several major political themes, including higher minimum wage and the focus of politicians working for the "other 99 percent of Canadians and not the top 1 percent" was a direct result of the movement.

98) What are some of the general ethical issues in business?

Answer: Answers will vary

General ethical issues include conflicts of interest that exist when people must choose whether to advance their own interests or those of others. Fairness and honesty relate to the general values that guide decision makers. Communications is another area in which ethical concerns may arise. The behaviour of businesspersons toward customers, suppliers, and others in their workplaces may also generate ethical concerns.

99) Describe how ethics is related to the culture in which a business operates.

Answer: Answers will vary

In Canada, for example, it would be inappropriate for a businessperson to bring an elaborately wrapped gift to a prospective client on their first meeting—the gift could be viewed as a bribe. In Japan, however, it is considered impolite not to bring a gift. Experience with the culture in which a business operates is critical to understanding what is ethical or unethical.

100) Academic misconduct is not pervasive in Canada. Do you agree or disagree? Why?

Answer: Answers will vary

According to the first major study of academic misconduct in Canada, cheating, deceit, and plagiarism were found to be serious problems. Students admitted to having engaged in some form of misconduct while completing their academic work. Seventy-three percent admitted to "serious" cheating while in high school and 53 percent of undergrads admitted they are still cheating in university.

101) How can an organization improve ethical behaviour?

Answer: Answers will vary

Understanding how people choose their ethical standards and what prompts them to engage in unethical behaviour may reverse the current trend toward unethical behaviour in business. Establishing and enforcing ethical standards and policies within a business can reduce unethical behaviour by defining which activities are acceptable and which are not, and removing the opportunity to act unethically. Codes of ethics and training programs can help the business create a corporate culture that encourages ethical behaviour.

102) Identify the three factors that influence business ethics.

Answer: Answers will vary

[INSERT GRAPHIC]

103) What are the four dimensions of social responsibility?

Answer: Answers will vary

Economic, legal, ethical, and voluntary concerns represent the four dimensions of social responsibility. Earning profits is the foundation of these dimensions and complying with the law is the next step. A business whose sole objective is to maximize profits is not likely to consider its social responsibilities although its activities will probably be legal. Voluntary responsibilities are additional activities that may not be required, but they promote human welfare or goodwill.

104) Provide four arguments in favour of social responsibility.

Answer: Answers will vary

See Table 2.7 — The Arguments for and against Social Responsibility

Business helped to create many of the social problems that exist today, so it should play a significant role in solving them, especially in the areas of pollution reduction and cleanup.

Businesses should be more responsible because they have the financial and technical resources to solve social problems.

As members of society, businesses should do their fair share to help others.

Socially responsible decision making by businesses can prevent increased government regulation.

Social responsibility is necessary to ensure economic survival: If businesses want educated and employed employees, customers with money to spend, and suppliers with quality goods and services in the years to come, they must take steps to help solve the social and environmental problems that exist today.

105) Provide four arguments against social responsibility.

Answer: Answers will vary

See Table 2.7 — The Arguments for and against Social Responsibility

It sidetracks managers from the primary goal of business—earning profits. Every dollar donated to causes or otherwise spent on society's problems is a dollar less for owners and investors.

Participation in social programs gives businesses greater power, perhaps at the expense of particular segments of society.

Some people question whether business has the expertise needed to assess and make decisions about social problems.

Many people believe that social problems are the responsibility of government agencies and officials who can be held accountable by voters.

- 106) Discuss the social responsibility issues related to providing equal opportunities for all employees, regardless of their sex, age, race, religion, or nationality.

Answer: Answers will vary

Women and minorities have been slighted in the past in terms of education, employment, and advancement opportunities.

In some organizations, female employees continue to be paid lower wages and salaries than men in comparable positions.

Women, who continue to bear most child-rearing responsibilities, often experience conflict between those responsibilities and their duties as employees.

Day care has become a major employment issue for women, and more companies are providing daycare facilities as part of their effort to recruit and advance women in the workforce.

Companies are considering alternative scheduling such as flex-time and job sharing to accommodate employee concerns.

Telecommuting has grown significantly over the past five to ten years.

- 107) Discuss the environmental issues managers must confront in dealing with social responsibility issues.

Answer: Answers will vary

Managers today must consider the consequences of their actions on the environment as a part of social responsibility. One area of concern is the controversial business practice of animal testing in cosmetics and drugs. Business practices that harm endangered wildlife and their habitats are an environmental issue. Businesses must also be concerned with their contributions to air, water, and land pollution as a result of their operations. In response to these concerns, many firms are trying to eliminate wasteful practices, the emission of pollutants, and/or the use of harmful chemicals from their manufacturing processes.

Although many people use the terms social responsibility and ethics interchangeably, they do not mean the same thing. Business ethics relate to an individual's or a work group's decisions that society evaluates as right or wrong whereas social responsibility is a broader concept that concerns the impact of the entire business's activities on society.

The Occupy Movement can be described as a global protest against social and economic inequality. Protestors believe that global corporations (notably financial institutions and wealthy individuals) have an undue influence in politics leading to economic and social problems that undermine democracy. The movement, which originated in New York, spread quickly throughout North America as protestors built highly visible areas such as in public parks or in front of government buildings. Today, people in the movement claim they are still working on ending economic disparity and note several political themes, including higher minimum wage and the focus of politicians working for the "other 99 percent of Canadians and not the top 1 percent" was a direct result of the movement.

General ethical issues include conflicts of interest that exist when people must choose whether to advance their own interests or those of others. Fairness and honesty relate to the general values of decision makers. Communication is another area in which ethical concerns may arise. The behaviour of businesspersons toward customers, suppliers and others in their workplaces may also generate ethical concerns.

In Canada, for example, it would be inappropriate for a businessperson to bring an elaborately wrapped gift to a prospective client on their first meeting—the gift could be viewed as a bribe. In Japan, however, it is considered impolite not to bring a gift. Experience with the culture in which a business operates is critical to understanding what is ethical or unethical.

According to the first major study of academic misconduct in Canada, cheating, deceit, and plagiarism were the most serious problems. Students admitted to having engaged in some form of misconduct while completing their academic work. Seventy-three percent admitted to "serious" cheating while in high school and 53 percent of undergrads admitted they are still cheating in university.

Understanding how people choose their ethical standards and what prompts them to engage in unethical behavior may reverse the current trend toward unethical behavior in business. Establishing and enforcing ethical standards and policies within a business can reduce unethical behavior by describing which activities are acceptable and which are not, and removing the opportunity to act unethically. Codes of ethics and training programs can help the business create a corporate culture that encourages ethical behavior.

Economic, legal, ethical, and voluntary concerns represent the four dimensions of social responsibility. Economic profits is the foundation of these dimensions and complying with the law is the next step. A business whose objective is to maximize profits is not likely to consider its social responsibility, although its activities will be legal. Voluntary responsibilities are additional activities that may not be required, but they promote human welfare or goodwill.

See Table 2.7 – The Arguments for and against Social Responsibility

Businesses helped to create many of the social problems that exist today, so it should play a significant role in solving them, especially in the areas of pollution reduction and cleanup.

Businesses should be more responsible because they have the financial and technical resources to help solve social problems.

As members of society, businesses should do their fair share to help others.

Socially responsible decision making by businesses can prevent increased government regulation.

Social responsibility is necessary to ensure economic survival: If businesses want educated and healthy employees with money to spend, and suppliers with quality goods and services in years to come, they must take steps to help solve the social and environmental problems that exist today.

Managers today must consider the consequences of their actions on the environment as a part of their social responsibility. One area of concern is the controversial business practice of animal testing for cosmetics and pharmaceuticals. Business practices that harm endangered wildlife and their habitats are another environmental issue. Businesses must also be concerned with their contributions to air, water, and land pollution as a result of their operations. In response to these concerns, many firms are trying to eliminate wasteful practices, the emission of pollutants, and/or the use of harmful chemicals from their manufacturing processes.
