- E. Low bargaining power of customers

Scenario C. Parker Brothers is a high-end furniture manufacturer located in the Midwest. Mr. Herbert "Bud" Parker started the firm as a young man in the 1960s. The firm has grown, but with growth, it has never forgotten the vision of Mr. Parker: to be creative in all that the firm does while rewarding employees who show innovation and entrepreneurial leadership. Each year the Budding Genius Award is given to the employee who comes up with the best design or marketing idea. New employees are told of the organization's history of product innovation and are taken on a tour of the "Wall of Parker Legends," where pictures of outstanding employees are hung with descriptions of their accomplishments. Managers at the firm encourage their team members to take risks in proposing new ideas. The company prides itself on its product leadership.

105. The stories about the "Parker Legends" and the organization's most innovative designs are all clues to understanding the \_\_\_\_\_.

- A. organization culture
- B. company's macroenvironment
- C. organization's competitive environment
- D. collective competitive intelligence
- E. organizational structure

106. The culture at Parker Brothers can be best described as a(an) \_\_\_\_\_ culture.

- A. clan
- B. hierarchy
- C. adhocracy
- D. bureaucracy
- E. market

107. Based on the information in Scenario C, which of the following is likely to be the dominant attribute of Parker Brothers?

- A. Rules and regulations
- B. Creativity
- C. Competitiveness
- D. Control
- E. Collaboration

Scenario D. Lupe works for a small company that makes bottled ketchup, salsa, and other condiments. She reports to the CFO. It is her job to predict the costs of raw materials for the next five years. She uses various research sources, including the news, to learn who the competitors are and what they have been doing. In fact, she subscribes to an analyst e-newsletter that tells her about crop availability and weather conditions all around the globe. Every month she develops a spreadsheet for her boss indicating the likely costs of vegetables given the type of weather conditions expected in each area of the world and thus the availability of particular crops. She is also involved in a team that is investigating how to cut production costs. They have recently met with Fresh Sips, a company that bottles water. Fresh Sips is considered the top company in the bottled water industry, especially in bottling process knowledge. Lupe's team is comparing their processes to those of Fresh Sips to see how they might improve.

108. When predicting the costs for her company, Lupe is engaging in \_\_\_\_\_.

- A. forecasting
- B. competitive intelligence
- C. environmental scanning
- D. benchmarking
- E. scenario development

109. The information Lupe is using to compete in a better way is called \_\_\_\_\_.

- A. mission statement
- B. competitive intelligence
- C. best-case scenario
- D. organizational database
- E. knowledge document

110. The spreadsheet that Lupe uses gives her a chance to examine different projections, which is a form of \_\_\_\_\_.

- A. divestiture
- B. strategic maneuvering
- C. domain selection
- D. benchmarking
- E. scenario development

111. Which of the following are Lupe and her team using when they learn from Fresh Sips about its bottling process?

- A. Forecasting
- B. Strategic maneuvering
- C. Domain selection
- D. Benchmarking
- E. Scenario development

## Chapter 02 The External and Internal Environments **Answer Key**

### True / False Questions

1. Organizations are open systems that affect and are affected by their external environments.

**TRUE**

Organizations are open systems—that is, they are affected by and in turn affect their external environments. For example, they take in inputs from their environment and use them to create products and services that are outputs to their environment.

- A. The stock market has little effect on the amount of capital a company has.
  - B. If a company exceeds its performance expectations, its stock price will often drop.
  - C. Publicly held companies are more insulated from the stock market than privately held companies.
  - D.** The stock market may have a profound effect on the behavior of individual managers.
  - E. Stock market fluctuations have little effect on the compensation of managers.

An important economic influence on a company is the stock market. When investors bid up stock prices, they are paying more to own shares in companies, which means the companies have more capital to fuel their strategies. The stock market can also have a profound effect on the behavior of individual managers. In publicly held companies, managers throughout the organization may feel required to meet the stock market's earnings expectations.

- A. deductions in the tax code
- B. fines on heavy polluters
- C. laws against bribing officials
- D. court rulings against monopolies
- E. failure to rule a new product as safe

U.S. government policies impose strategic constraints on organizations but may also provide opportunities. The government can affect business opportunities through tax laws, economic policies, and international trade rulings. An example of restraint on business action is the U.S. government's standards regarding bribery.

- B. It is decreasing the number of workers.
- C. It is decreasing the number of consumers.
- D. It is making the educational levels of the workforce more similar.
- E. It is decreasing the amount of paperwork needed to hire workers.

A factor that significantly influences the U.S. population and labor force is immigration. Immigrants represent over 15 percent of the U.S. workforce, although immigrants are a stronger presence in the West (almost 24 percent of the workforce) than in the Midwest (less than 8 percent). Immigration is one reason the labor force of the future will be more ethnically diverse than it is today.

86. Lana owns Party Platter, a store that specializes in festive decorations and attractive but disposable tableware. She is projecting that the economy will rebound this fall. She ordered additional holiday-themed merchandise in February in anticipation of possible surge in sales during the holiday season. In this case, which of the following methods is Lana using to be sure that she has enough gifts for extra holiday customers?
- A. Just-in-time inventory
  - B. Smoothing
  - C. Benchmarking
  - D. Buffering**
  - E. Diversification

Buffering is creating supplies of excess resources in case of unpredictable needs. In Lana's case, she has accumulated additional inventory to sell during the holiday season because demand is unpredictable.

Scenario A. Marietta's Attic is a small retail store that specializes in antique figurines and decorative knickknacks. In analyzing the environment, Marietta has uncovered the following interesting findings:

1. Marietta has recently purchased more inventory than in the past. The people from whom she buys are selling off more knickknacks because their children are not interested in this type of decorative items and they would prefer to liquidate unnecessary household items to help them with their daily expenses.
2. Marietta discovered that her business is in a historical preservation district. As she considers remodeling the shop, she realized that she must pay attention to the guidelines set forth in the governing laws.
3. Marietta's buyer-customer base seems to be changing. The tastes of the younger generation near her shop are shifting to modern decor, so the customer base to which she sells is shrinking.
4. Marietta has been told that she should consider selling her inventory via the Internet, but she does not own (or understand how to use) a computer.
5. In reading a survey of regional business, Marietta discovered that there are no other antique knickknack stores within 200 miles.

97. In Scenario A, which of the following elements of the macroenvironment was part of Marietta's findings?
- A. Sustainability
  - B. Psychology
  - C. Corporate governance
  - D. Sociology
  - E. Technology**

The macroenvironment includes legal and political, economic, technological, demographic, social, and natural factors that generally affect all organizations. The only one of these categories mentioned in the question is technology, illustrated by selling on the Internet.

It has been Bryan's lifelong dream. Bryan has won a lottery and is trying to decide if this is what he wants to do with the prize money. He decides to do an analysis of the competitive environment. After his analysis, he discovers several important issues. First, it will cost most of Bryan's lottery winnings to finance a bed and breakfast in Silver Eagle. Second, it will be difficult to attract new customers because they have so many lodging choices available to them in Silver Eagle and the surrounding towns. Finally, the competition in the bed and breakfast industry is considered fierce by industry analysts and this is frightening to someone, like Bryan, who has never worked in that industry.

101. Which of the following factors would Bryan have considered while analyzing the competitive environment?

Scenario D. Lupe works for a small company that makes bottled ketchup, salsa, and other condiments. She reports to the CFO. It is her job to predict the costs of raw materials for the next five years. She uses various research sources, including the news, to learn who the competitors are and what they have been doing. In fact, she subscribes to an analyst e-newsletter that tells her about crop availability and weather conditions all around the globe. Every month she develops a spreadsheet for her boss indicating the likely costs of vegetables given the type of weather conditions expected in each area of the world and thus the availability of particular crops. She is also involved in a team that is investigating how to cut production costs. They have recently met with Fresh Sips, a company that bottles water. Fresh Sips is considered the top company in the bottled water industry, especially in bottling process knowledge. Lupe's team is comparing their processes to those of Fresh Sips to see how they might improve.

108. When predicting the costs for her company, Lupe is engaging in \_\_\_\_\_.
