189) List the steps in processing transactions.

Answer: Business transactions and events are the starting point. Source documents are analyzed for the effects of the transactions and events on the accounting records. The information is recorded into the journal. The information is then posted to the accounts and a trial balance is prepared from the ledger balances. The final step is the preparation of financial statements for decision makers.

190) Describe what source documents are and the purpose they serve in a business.

Answer: Source documents are the proof that transactions and events have occurred and should be recorded in the accounting records. They provide objective and reliable evidence about transactions and their amounts. Examples of source documents include checks, invoices, sales receipts, credit card statements, and bank statements. They can be in hard copy or electronic form.

193) Explain debits and credits and their role in the accounting system of a business.

Answer: Debit refers to the left side of an account and credit refers to the right side of an account. Debits and credits are part of the double-entry accounting system. This system is based on the concept that all transactions and events affect at least two accounts. The double entry system is organized around the accounting equation which states that assets = liabilities + equity. Assets, expenses, and the owner's withdrawal account all have normal debit balances. Liabilities, revenues, and the owner's capital account all have normal credit balances.

195) Explain the recording and posting processes.

Answer: Information from business transactions and events is recorded in the journal in the form of journal entries. The journal entries include the date, the account titles, and debit and credit amounts. Journal entries may also include a further description of the transaction. During the posting process, the debit and credit amounts recorded in the journal are transferred to the individual accounts in the ledger.

196) What is a trial balance? What is its purpose?

Answer: The trial balance is a list of all of the accounts in the ledger with balances at a point in time presented in debit and credit columns according to their balance. The purpose of the trial balance is to summarize the account totals and to verify the accuracy of the total debits and credits. If the total debits and credits are not equal, it indicates an error in the accounting records. However, even if debits do equal credits, it does not guarantee that no errors were made in recording and posting transactions.

197) Describe the link between a business's income statement, the statement of owner's equity, and the balance sheet.

Answer: The income statement shows the amount of net income the company has earned. That income is carried to the statement of owner's equity. The net income is added to the beginning owner's equity, and owner's withdrawals are subtracted to determine the ending owner's equity. The ending owner's equity is then reported on the balance sheet.

211) Jerry's Shop had the following assets and liabilities at the beginning and end of the current year:

	Assets	Liabilities
Beginning of the year .....	\$114,000	\$68,000
End of the year .....	135,000	73,000

If Jerry made no investments in the business and withdrew no assets during the year, what was the amount of net income earned by Jerry's Shop?

Answer: Beginning owner's equity = \$114,000 - \$68,000 = \$46,000

Ending owner's equity = \$135,000 - \$73,000 = \$62,000

Increase in owner's equity = \$62,000 - \$46,000 = \$16,000

Because there were no investments or withdrawals during the year, net income is \$16,000.

End of the year .....	135,000	73,000

If the owner invested an additional \$12,000 in the business and withdrew \$5,000 during the year, what was the amount of net income earned by Archer Co.?

Answer: Beginning owner's equity = \$114,000 - \$68,000 = \$46,000

Ending owner's equity = \$135,000 - \$73,000 = \$62,000

Increase in owner's equity = \$62,000 - \$46,000 = \$16,000

221) The following trial balance is prepared from the general ledger of HG's Auto Maintenance.

HG'S AUTO MAINTENANCE  
Trial Balance  
October 31

	Debit	Credit
Cash	\$ 1,975	
Accounts receivable	2,800	
Supplies	500	
Shop equipment	13,000	
Office equipment	6,600	
Accounts payable		\$ 4,510

Repair fees earned		11,875
Supplies expense	<u>8,600</u>	
Totals	<u>\$37,675</u>	<u>\$38,385</u>

Because the trial balance did not balance, you decided to examine the accounting records. You found that the following errors had been made:

1. A purchase of supplies on account for \$245 was posted as a debit to Supplies and as a debit to Accounts Payable.
2. An investment of \$500 cash by the owner was debited to Hal Griffin, Capital and credited to Cash.
3. In computing the balance of the Accounts Receivable account, a debit of \$600 was omitted from the computation.
4. One debit of \$300 to the Hal Griffin, Withdrawals account was posted as a credit.
5. Office equipment purchased for \$800 was posted to the Shop Equipment account.
6. One entire entry was not posted to the general ledger. The transaction involved the receipt of \$125 cash for repair services performed for cash.
