

# Chapter 02

## Financial Statements, Taxes, and Cash Flow

### Test Bank - Static Key

1. Net working capital is defined as:

- A. the depreciated book value of a firm's fixed assets.
- B. the value of a firm's current assets.
- C. available cash minus current liabilities.
- D. total assets minus total liabilities.
- E.** current assets minus current liabilities.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Net working capital*

2. The accounting statement that measures the revenues, expenses, and net income of a firm over a period of time is called the:

- A. statement of cash flows.
- B.** income statement.
- C. GAAP statement.
- D. balance sheet.
- E. net working capital schedule.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy*

*Learning Objective: 02-02 Distinguish accounting income from cash flow.  
Section: 2.2 The Income Statement  
Topic: Income statement*

3. The financial statement that summarizes a firm's accounting value as of a particular date is called the:

- A. income statement.
- B. cash flow statement.
- C. liquidity position.
- D.** balance sheet.
- E. periodic operating statement.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet*

4. Which one of the following decreases net income but does not affect the operating cash flow of a firm that owes no taxes for the current year?

- A. Indirect cost
- B. Direct cost

*Copyright ©2020 McGraw-Hill Education. All rights reserved. No reproduction or distribution without the prior written consent of McGraw-Hill Education.*

- C.** Noncash item
- D. Period cost
- E. Variable cost

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy

Learning Objective: 02-02 Distinguish accounting income from cash flow.  
Section: 2.2 The Income Statement  
Topic: Noncash items

5. Which one of the following terms is defined as the total tax paid divided by the total taxable income?

- A.** Average tax rate
- B. Variable tax rate
- C. Marginal tax rate
- D. Absolute tax rate
- E. Contingent tax rate

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy

Learning Objective: 02-03 Explain the difference between average and marginal tax rates.  
Section: 2.3 Taxes  
Topic: Taxes

6. The tax rate that determines the amount of tax that will be due on the next dollar of taxable income earned is called the:

- A. average tax rate.
- B. variable tax rate.
- C.** marginal tax rate.
- D. fixed tax rate.
- E. ordinary tax rate.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy

Learning Objective: 02-03 Explain the difference between average and marginal tax rates.  
Section: 2.3 Taxes  
Topic: Taxes

7. Cash flow from assets is defined as:

- A. the cash flow to shareholders minus the cash flow to creditors.
- B. operating cash flow plus the cash flow to creditors plus the cash flow to shareholders.
- C.** operating cash flow minus the change in net working capital minus net capital spending.
- D. operating cash flow plus net capital spending plus the change in net working capital.
- E. cash flow to shareholders minus net capital spending plus the change in net working capital.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy

Learning Objective: 02-04 Determine a firm's cash flow from its financial statements.  
Section: 2.4 Cash Flow  
Topic: Cash flow from assets

8. Operating cash flow is defined as:

- A. a firm's net profit over a specified period of time.
- B.** the cash that a firm generates from its normal business activities.
- C. a firm's operating margin.
- D. the change in the net working capital over a stated period of time.
- E. the cash that is generated and added to retained earnings.

AACSB: Analytical Thinking  
 Accessibility: Keyboard Navigation  
 Blooms: Remember  
 Difficulty: 1 Easy  
 Learning Objective: 02-04 Determine a firms cash flow from its financial statements.  
 Section: 2.4 Cash Flow  
 Topic: Operating cash flow

9. Which one of the following has nearly the same meaning as free cash flow?

- A. Net income
- B.** Cash flow from assets
- C. Operating cash flow
- D. Cash flow to shareholders
- E. Addition to retained earnings

AACSB: Analytical Thinking  
 Accessibility: Keyboard Navigation  
 Blooms: Remember  
 Difficulty: 1 Easy  
 Learning Objective: 02-04 Determine a firms cash flow from its financial statements.  
 Section: 2.4 Cash Flow  
 Topic: Free cash flow

10. Cash flow to creditors is defined as:

- A.** interest paid minus net new borrowing.
- B. interest paid plus net new borrowing.
- C. operating cash flow minus net capital spending minus the change in net working capital.
- D. dividends paid plus net new borrowing.
- E. cash flow from assets plus net new equity.

AACSB: Analytical Thinking  
 Accessibility: Keyboard Navigation  
 Blooms: Remember  
 Difficulty: 1 Easy  
 Learning Objective: 02-04 Determine a firms cash flow from its financial statements.  
 Section: 2.4 Cash Flow  
 Topic: Cash flow to creditors

11. Cash flow to stockholders is defined as:

- A. cash flow from assets plus cash flow to creditors.
- B. operating cash flow minus cash flow to creditors.
- C. dividends paid plus the change in retained earnings.
- D.** dividends paid minus net new equity raised.
- E. net income minus the addition to retained earnings.

AACSB: Analytical Thinking  
 Accessibility: Keyboard Navigation  
 Blooms: Remember  
 Difficulty: 1 Easy  
 Learning Objective: 02-04 Determine a firms cash flow from its financial statements.  
 Section: 2.4 Cash Flow  
 Topic: Cash flow to stockholders

12. Which one of the following is an intangible fixed asset?

*Copyright ©2020 McGraw-Hill Education. All rights reserved. No reproduction or distribution without the prior written consent of McGraw-Hill Education.*

- A. Inventory
- B. Machinery
- C.** Copyright
- D. Account receivable
- E. Building

*AACSB: Analytical Thinking

Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet*

13. Production equipment is classified as:

- A. a net working capital item.
- B. a current liability.
- C. a current asset.
- D.** a tangible fixed asset.
- E. an intangible fixed asset.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet*

14. Net working capital includes:

- A. a land purchase.
- B.** an invoice from a supplier.
- C. non-cash expenses.
- D. fixed asset depreciation.
- E. the balance due on a 15-year mortgage.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Net working capital*

15. Over the past year, a firm decreased its current assets and increased its current liabilities. As a result, the firm's net working capital:

- A. had to increase.
- B.** had to decrease.
- C. remained constant.
- D. could have either increased, decreased, or remained constant.
- E. was unaffected as the changes occurred in the firm's current accounts.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Net working capital*

16. Net working capital increases when:

- A. fixed assets are purchased for cash.
- B. inventory is purchased on credit.
- C. inventory is sold at cost.
- D. a credit customer pays for his or her purchase.
- E.** inventory is sold at a profit.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Net working capital

17. Shareholders' equity is equal to:

- A. total assets plus total liabilities.
- B. net fixed assets minus total liabilities.
- C.** net fixed assets minus long-term debt plus net working capital.
- D. net working capital plus total assets.
- E. total assets minus net working capital.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet

18. Paid-in surplus is classified as:

- A.** owners' equity.
- B. net working capital.
- C. a current asset.
- D. a cash expense.
- E. long-term debt.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet

19. Shareholders' equity is best defined as:

- A.** the residual value of a firm.
- B. positive net working capital.
- C. the net liquidity of a firm.
- D. cash inflows minus cash outflows.
- E. the cumulative profits of a firm over time.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet

20. All else held constant, the book value of owners' equity will decrease when:

- A. the market value of inventory increases.
- B.** dividends exceed net income for a period.
- C. cash is used to pay an accounts payable.
- D. a long-term debt is repaid.
- E. taxable income increases.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Balance sheet

21. Net working capital decreases when:

- A. a new 3-year loan is obtained with the proceeds used to purchase inventory.
- B. a credit customer pays his or her bill in full.
- C. depreciation increases.
- D. a long-term debt is used to finance a fixed asset purchase.
- E.** a dividend is paid to current shareholders.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Net working capital

22. A firm's liquidity level decreases when:

- A.** inventory is purchased with cash.
- B. inventory is sold on credit.
- C. inventory is sold for cash.
- D. an account receivable is collected.
- E. proceeds from a long-term loan are received.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Liquidity

23. Highly liquid assets:

- A. increase the probability a firm will face financial distress.
- B. appear on the right side of a balance sheet.
- C. generally produce a high rate of return.
- D.** can be sold quickly at close to full value.
- E. include all intangible assets.

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Liquidity

24. Financial leverage:

- A. increases as the net working capital increases.
- B. is equal to the market value of a firm divided by the firm's book value.
- C. is inversely related to the level of debt.
- D. is the ratio of a firm's revenues to its fixed expenses.
- E.** increases the potential return to the stockholders.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Capital structure*

25. The market value:

- A. of accounts receivable is generally higher than the book value of those receivables.
- B.** of an asset tends to provide a better guide to the actual worth of that asset than does the book value.
- C. of fixed assets will always exceed the book value of those assets.
- D. of an asset is reflected in the balance sheet.
- E. of an asset is lowered each year by the amount of depreciation expensed for that asset.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Market and book values*

26. Which one of the following is included in the market value of a firm but not in the book value?

- A. Raw materials
- B. Partially built inventory
- C. Long-term debt
- D.** Reputation of the firm
- E. Value of a partially depreciated machine

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Market and book values*

27. The market value of a firm's fixed assets:

- A. will always exceed the book value of those assets.
- B. is more predictable than the book value of those assets.
- C. in addition to the firm's net working capital reflects the true value of a firm.
- D. is decreased annually by the depreciation expense.
- E.** is equal to the estimated current cash value of those assets.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Remember  
Difficulty: 1 Easy*

*Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Market and book values*

28. Market values:

- A. reflect expected selling prices given the current economic situation.
- B. are affected by the accounting methods selected.
- C. are equal to the initial cost minus the depreciation to date.
- D. either remain constant or increase over time.
- E. are equal to the greater of the initial cost or the current expected sales value.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-01 Differentiate between accounting value (or book value) and market value.  
Section: 2.1 The Balance Sheet  
Topic: Market and book values*

29. Which one of the following statements concerning the balance sheet is correct?

- A. Total assets equal total liabilities minus total equity.
- B. Net working capital is equal total assets minus total liabilities.
- C.** Assets are listed in descending order of liquidity.
- D. Current assets are equal to total assets minus net working capital.
- E. Shareholders' equity is equal to net working capital minus net fixed assets plus long-term debt.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand

Topic: Balance sheet*

30. An income statement prepared according to GAAP:

- A. reflects the net cash flows of a firm over a stated period of time.
- B. reflects the financial position of a firm as of a particular date.
- C. distinguishes variable costs from fixed costs.
- D. records revenue when payment for a sale is received.
- E.** records expenses based on the matching principle.

*AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Understand  
Difficulty: 2 Medium  
Learning Objective: 02-02 Distinguish accounting income from cash flow.  
Section: 2.2 The Income Statement  
Topic: Income statement*

31. Net income increases when:

- A. fixed costs increase.
- B. depreciation increases.
- C. the average tax rate increases.
- D.** revenue increases.
- E. dividends cease.

*Topic: Income statement*

32. Based on the recognition principle, revenue is recorded on the financial statements when the:

- I. payment is collected for the sale of a good or service.
- II. earnings process is virtually complete.
- III. value of a sale can be reliably determined.
- IV. product is physically delivered to the buyer.

- A. I and II only
- B. I and IV only
- C.** II and III only
- D. II and IV only
- E. I and III only

*AACSB: Analytical Thinking*

 Learning Objective: 02-03 Explain the difference between average and marginal tax rates.  
 Section: 2.3 Taxes  
 Topic: Taxes

78. Use the following tax table to answer this question:

Taxable Income		Tax Rate
\$ 0–	9,525	10%
9,525–	38,700	12
38,700–	82,500	22
82,500–	157,500	24
157,500–	200,000	32
200,000–	500,000	35
500,000+		37

Andrews Dried Fruit, LLC has taxable income of \$630,000. How much does it owe in taxes?

- A. \$141,750
- B. \$\$154,800
- C**198,790
- D. \$220,500
- E. \$233,100

Feedback: Total tax =  $.10(\$9,525) + .12(\$29,175) + .22(\$43,800) + .24(\$75,000) + .32(\$42,500) + .35(300,000) + .37(630,000 - 500,000) = \$198,790$  Total

80. The Plaza Cafe has an operating cash flow of \$83,770, depreciation expense of \$43,514, and taxes paid of \$21,590. A partial listing of its balance sheet accounts is as follows:

	Beginning Balance	Ending Balance
Current assets	\$138,590	\$129,204
Net fixed assets	599,608	597,913
Current liabilities	143,215	139,827
Long-term debt	408,660	402,120

What is the amount of the cash flow from assets?

- A. \$26,359
- B. \$47,949**
- C. \$61,487
- D. \$43,909
- E. \$35,953

Feedback: Cash flow from assets = \$83,770 - (\$597,913 - 599,608 + 43,514) - [(\$129,204 - 139,827) - (\$138,590 - 143,215)] = \$47,949

- A. \$21,200
- B. \$26,700
- C. \$54,900
- D. \$102,400
- E. \$105,800**

Feedback: Cash flow to creditors =  $\$42,300 - (\$574,600 - 638,100) = \$105,800$

AACSB: Analytical Thinking  
Accessibility: Keyboard Navigation  
Blooms: Analyze  
Difficulty: 3 Hard  
Learning Objective: 02-04 Determine a firms cash flow from its financial statements.  
Section: 2.4 Cash Flow  
Topic: Cash flow to creditors

102. Assume a company has sales of \$423,800, production costs of \$297,400, other expenses of \$18,500, depreciation expense of \$36,300, interest expense of \$2,100, taxes of \$23,600, and dividends of \$12,000. In addition, you're told that during the year the firm issued \$4,500 in new equity and redeemed \$6,500 in outstanding long-term debt. If net fixed assets increased by \$7,400 during the year, what was the addition to net working capital?

- A. \$11,500
- B. \$24,500**
- C. \$15,800
- D. \$37,500
- E. \$30,400

Feedback:  $OCF = \$423,800 - 297,400 - 18,500 - 23,600 = \$84,300$   $NCS = \$7,400 + 36,300 = \$43,700$   $CFA = CFC + CFS = [\$2,100 - (-6,500)] + [\$12,000 - 4,500] = \$16,100$  Add to NWC =  $OCF - NCS - CFA = \$84,300 - 43,700 - 16,100 = \$24,500$

Section: 2.4 Cash Flow  
Topic: Change in net working capital

103. Daisy Co. has \$267,000 in taxable income and Binget Co. has \$1,600,000 in taxable income. Suppose both firms have identified a new project that will increase taxable income by \$10,000. The additional project will increase Able Co.'s taxes by \_\_\_\_\_ and Bravo Co.'s taxes by \_\_\_\_\_.

Taxable Income		Tax Rate
\$ 0–	9,525	10%
9,525–	38,700	12
38,700–	82,500	22
82,500–	157,500	24
157,500–	200,000	32
200,000–	500,000	35
500,000+		37

- A. \$1,500; \$1,500
- B. \$3,400; \$3,400
- C. \$3,400; \$3,700
- D. \$3,500; \$3,700**
- E. \$3,700; \$3,700

Feedback: Daisy Co. tax = \$10,000 \* 0.35 = \$3,500 Binget Co. tax = \$10,000 \*.37 = \$3,700

AACSB: Analytical Thinking

Blooms: Analyze

Learning Objective: 02-03 Explain the difference between average and marginal tax rates.

Section: 2.3 Taxes

Topic: Taxes

104. Dixie's sales for the year were \$1,678,000. Cost of goods sold, administrative and selling expenses, and depreciation expenses were \$1,141,000, \$304,000, and \$143,000, respectively. In addition, the company had an interest expense of \$74,000 and a tax rate of 34 percent. What is the operating cash flow for the year?

- A. \$227,560**
- B. \$271,420
- C. \$223,330
- D. \$285,400
- E. \$217,700

Feedback: EBIT = [(\$1,678,000 -1,141,000 -304,000 -143,000 = \$90,000 Tax = (\$90,000 -74,000) \* .34 = \$5,440 OCF = \$90,000 + 143,000 -5,440 = \$227,560

Topic: Operating cash flow

105. For Year 2016, Precision Masters had sales of \$42,900, cost of goods sold of \$26,800, depreciation expense of \$1,900, interest expense of \$1,300, and dividends paid of \$1,000. At the beginning of the year, net fixed assets were \$14,300, current assets were \$8,700, and current liabilities were \$6,600. At the end of the year, net fixed assets were \$13,900, current assets were \$9,200, and current liabilities were \$7,400. The tax rate was 34 percent. What is the cash flow from assets for 2016?

- A. \$9,914
- B. \$11,114
- C. \$9,360
- D. \$10,514**
- E. \$11,970

Feedback: EBIT = [(\$42,900 - 26,800 - 1,900) = \$14,200 Taxes = (\$14,200 - 1,300)(.34) = \$4,386 OCF = \$14,200 + 1,900 - 4,386 = \$11,714 CFA = \$11,714 - (\$13,900 - 14,300 + 1,900) - [(\$9,200 - 7,400) - (\$8,700 - 6,600)] = \$10,514

Topic: Taxes

107. Generally Accepted Accounting Principles, as they relate to the Income Statement includes the recognition principle: to recognize revenue when the earnings process is virtually complete and the value of an exchange of goods or services is known or can be reliably determined.

Which of the following statements is true with regard to this principle?

- A. Income and expense items can be recorded at any time the company deems appropriate
- B. **Revenue is recognized at the time of sale. Costs associated with the sale of that product likewise would be recognized at that time**
- C. Revenues must be reported only when cash is collected
- D. Expenses can be smoothed to make earnings appear greater.

110. Kat Outfitting currently has \$22,500 in cash. The company owes \$49,500 to suppliers for merchandise and \$52,500 to the bank for a long-term loan. Customers owe the company \$41,000 for their purchases. The inventory has a book value of \$76,800 and an estimated market value of \$72,000. If the store compiled a balance sheet as of today, what would be the book value of the current assets?

- A. \$135,500
- B. \$79,500
- C. \$86,000
- D. \$140,300**
- E. \$144,000

Feedback: Current assets =  $\$22,500 + 41,000 + 76,800 = \$140,300$

111. Zoey Pet Supply had \$314,000 in net fixed assets at the beginning of the year. During the year, the company purchased \$98,200 in new equipment. It also sold, at a price of \$10,000, some old equipment that had a book value of \$12,500. The depreciation expense for the year was \$24,500. What is the net fixed asset balance at the end of the year?

- A. \$260,000
- B. \$283,700
- C. \$424,200
- D. \$375,200**
- E. \$277,000

Feedback: Ending net fixed assets =  $\$314,000 + 98,200 - 12,500 - 24,500 = \$375,200$
