

Financial Accounting Fundamentals, 7e (Wild)
Chapter 2 Accounting for Business Transactions

- 1) Business transactions and events are the starting points of financial statements.
- 2) Preparation of a trial balance is the first step in processing a financial transaction.
- 3) Source documents identify and describe transactions and events entering the accounting process.
- 4) Items such as sales receipts, bank statements, checks, and purchase orders are examples of a business's source documents.
- 5) An account is a record of increases and decreases in a specific asset, liability, equity, revenue, or expense item.
- 6) A customer's promise to pay on credit is classified as an *account payable* by the seller.
- 7) Dividends are subtracted on the income statement as a business expense.
- 8) The purchase of land and buildings will generally be recorded in the same ledger account.
- 9) Unearned revenues are classified as liabilities.
- 10) Cash dividends paid to stockholders are not reported on the income statement.
- 11) When a company provides services for which cash will not be received until some future date, the company should record the amount billed as accounts receivable.
- 12) Dividends always decrease equity.
- 13) Expenses always decrease equity.
- 14) Revenues always increase equity.
- 15) The issuance of common stock always decrease equity.
- 16) Unearned revenue is a liability that is settled in the future when a company delivers its products or services.
- 17) A company's chart of accounts is a list of all the accounts used and includes an identification number assigned to each account.
- 18) An account's balance is the difference between the total debits and total credits for the account, including any beginning balance.
- 19) The right side of an account is called the *debit* side.

- 20) In a double-entry accounting system, total debits must equal total credits for all entries, and total debit account balances in the ledger must equal total credit account balances.
- 21) Increases in liability accounts are recorded as debits.
- 22) Debits increase asset and expense accounts.
- 23) *Credits* always increase account balances.
- 24) An expense account normally has a credit balance.
- 25) A revenue account normally has a debit balance.
- 26) Asset accounts are decreased by debits.
- 27) *Debit* means increase and *credit* means decrease for all accounts.
- 28) Asset accounts normally have debit balances and revenue accounts normally have credit balances.
- 29) The Dividends account normally has a debit balance.
- 30) A debit entry always increases an account.
- 31) A transaction that credits an asset account and credits a liability account must also affect one or more other accounts.
- 32) A transaction that decreases a liability and increases an asset must also affect one or more other accounts.
- 33) If insurance coverage for the next two years is paid for in advance, the amount of the payment is debited to an asset account called Prepaid Insurance.
- 34) The purchase of supplies on credit should be recorded with a debit to Supplies and a credit to Accounts Payable.
- 35) If a company purchases equipment paying cash, the journal entry to record this transaction will include a debit to Cash.
- 36) If a company provides services to a customer on credit, the company providing the service should credit Accounts Receivable.
- 37) When a company bills a customer for \$700 for services performed, the journal entry to record this transaction will include a \$700 debit to Services Revenue.

- 38) The debt ratio helps to assess the risk a company has of failing to pay its debts and is helpful to both its owners and creditors.
- 39) The higher a company's debt ratio, the lower the risk of a company not being able to pay its debts.
- 40) The debt ratio is calculated by dividing total assets by total liabilities.
- 41) A company that finances a relatively large portion of its assets with liabilities is said to have a high degree of financial leverage.
- 42) If a company is highly leveraged, this means that it has relatively high risk of not being able to repay its debt.
- 43) Stark Co. has liabilities of \$105 million and total assets of \$350 million. Its debt ratio is 40.0%.
- 44) A journal entry that affects only two accounts is called a compound entry.
- 45) *Posting* is the transfer of journal entry information to the ledger.
- 46) Transactions are recorded first in the ledger and then transferred to the journal.
- 47) A general journal gives a complete record of each transaction in one place, and shows the debits and credits for each transaction.
- 48) The general journal is a collection of all accounts and their balances.
- 49) At a given point in time, a trial balance is a list of all ledger accounts and their balances.
- 50) Errors made in journalizing transactions, posting to the ledger, and preparing the trial balance can still exist in a balanced trial balance.
- 51) The trial balance can serve as a replacement for the balance sheet, since total debits must equal total credits.
- 52) A balanced trial balance is proof that no errors were made in journalizing transactions, posting to the ledger, and preparing the trial balance.
- 53) If cash was incorrectly debited for \$100 instead of correctly debiting accounts receivable for \$100, assuming no other errors, the trial balance will balance.
- 54) The financial statement that summarizes how equity changes over the reporting period is called the balance sheet.
- 55) An income statement reports revenues earned minus expenses incurred over a period of time.

- 56) The detail of individual revenue and expense accounts is reported on the balance sheet.
- 57) The heading on every financial statement lists the three W's—Who (the name of the business); What (the name of the statement); and Where (the organization's address).
- 58) If the Common stock account had a \$10,000 credit balance at the beginning of the period, and during the period, an additional \$5,000 of common stock is issued, the balance in the common stock account listed on the trial balance will be equal to a debit balance of \$5,000.
- 59) Dividends paid to stockholders are **not** reported on a business's income statement.
- 60) An income statement reports the revenues earned minus expenses incurred by a business over a period of time.
- 61) The balance sheet reports the financial position of a company at a point in time.

Common Stock.....	50,000	Unearned Management Fees	4,000
Management Revenue.	175,000	Dividends	48,000

Calculate the correct balance for Cash and prepare a trial balance.

220) At year-end, Henry Laundry Service noted the following errors in its trial balance:

1. It understated the total debits to the Cash account by \$500 when computing the account balance.
2. A credit sale for \$311 was recorded as a credit to the revenue account, but the offsetting debit was not posted.
3. A cash payment to a creditor for \$2,600 was never recorded.
4. The \$680 balance of the Prepaid Insurance account was listed in the credit column of the trial balance.
5. A \$24,900 van purchase was recorded as a \$24,090 debit to Equipment and a \$24,090 credit to Notes Payable.
6. A purchase of office supplies for \$150 was recorded as a debit to Office Equipment. The offsetting credit entry was correct.
7. An additional investment of \$4,000 by stockholders was recorded as a debit to Common Stock and as a credit to Cash.
8. The cash payment of the \$510 utility bill for December was recorded (but not paid) twice.
9. The revenue account balance of \$79,817 was listed on the trial balance as \$97,817.
10. A \$1,000 cash dividend was recorded as a \$100 debit to Dividends and \$100 credit to cash.

Using the form below, indicate whether each error would cause the trial balance to be out of balance, the amount of any imbalance, and whether a correcting journal entry is required.

Dividends	4,200	
Repair fees earned		11,875
Supplies expense	8,600	
Totals	<u>\$37,675</u>	<u>\$38,385</u>

Because the trial balance did not balance, you decided to examine the accounting records. You found that the following errors had been made:

1. A purchase of supplies on account for \$245 was posted as a debit to Supplies and as a debit to Accounts Payable.
2. An investment of \$500 cash by a stockholder was debited to Common Stock and credited to Cash.
3. In computing the balance of the Accounts Receivable account, a debit of \$600 was omitted from the computation.
4. One debit of \$300 to the Dividends account was posted as a credit.
5. Office equipment purchased for \$800 was posted to the Shop Equipment account.
6. One entire entry was not posted to the general ledger. The transaction involved the receipt of \$125 cash for repair services performed for cash.

Prepare a corrected trial balance for the HG's Auto Maintenance as of October 31.

222) Figgaro Company's accounts and their balances, as of the end of August, are included below. All accounts have normal balances:
