(Answers: 1c, 2c, 3c, 4b, 5d, 6a, 7d, 8b, 9a, 10c, 11b, 12d, 13c, 14d, 15d, 16b, 17c, 18c, 19a, 20a)

## True/False Questions

1. Under the medical model, health is defined as a complete state of physical, mental, and social well-being, and not just the absence of disease or infirmity.
2. A chronic condition is relatively severe, episodic, and often treatable.
3. The main objective of the ACA is to restructure the way health care is delivered in the US.
4. The presence of an agent does not ensure that disease will occur.
5. Secondary prevention refers to rehabilitative therapies and the monitoring of health care processes to prevent complications or to prevent further illness, injury, or disability.
6. Generally, people with better education have higher incomes and better health status.
7. Cultural beliefs have very little to do with health.
8. Equity requires distributional efficiency.
9. The two broad goals of Healthy People 2010 are to eliminate health disparities and improve the quality of healthcare services.
10. Activities of daily living (ADL) are activities necessary for living independently in the community (such as driving a car, taking medicine, and handling money), and instrumental activities of daily living (IADL) are activities necessary for basic functioning (such as eating, bathing, and dressing).
(Answers: 1-false, 2-false, 3-false, 4-true, 5-false, 6-true, 7 -false, 8 -true, 9 -false, 10-false)
