#### Note:

No entries will be made for the 20X0/X1 local taxes that are paid in Feb 20X2 – this situation arose because Sasha Parker had assumed that the business would only pay the taxes from the start of the tax year, e.g. 1.4.20X1.

However, there will be an entry in the profit and loss account and the statement of financial position.

**(b) Sasha Parker – profit and loss account for six months ended 30 June 20X1**

	€000	€000

**(c) Possible action to deal with exceeding agreed overdraft limit**

Approach the bank to re-negotiate the overdraft or arrange a loan facility for an agreed term.

The amount and the period for which additional facilities are required depend on preparing a projected cash flow statement for a longer period taking into account future plans, e.g. owner's drawings requirement and any additional capital expenditure.

In particular, consider alternatives such as the following:

- Leasing vehicles and/or machinery
- Mortgaging the property
- Getting debts in quicker manner
- Introducing more capital
- Obtaining or providing loan capital.

***(d) Investment of surplus funds***

**Acid test ratio**

At the end of the first six-month trading, Norman's statement of financial position shows that the acid test ratio is 1.28:1 (266.22/208.55) – this is higher than the basic 1:1 ratio but it should be compared with the ratio of similar businesses in the same industry in order to establish a norm. It would appear, however, that the business has surplus funds to invest.

**Amount to invest**

A projected cash flow statement is required, taking into account future plans regarding the owner's drawing requirements, future capital commitments and working capital criteria, e.g. debtor collection and creditor payment terms.

**Period to invest**

The projected cash flow will give an indication of the period of the investment, e.g. it could range from overnight on the money market to term investments.

The important aspect is that the owner should be aware of the projected cash flows, so that return on surplus funds can be maximised.
