

Chapter 2 - Foundations of Quality Management

1. Deming laid out a “quality improvement program” for companies such as Ford, GM, and Procter & Gamble, when invited to work with them to improve their quality.

- a. True
- b. False

ANSWER: False

DIFFICULTY: Difficulty: Easy

ACCREDITING STANDARDS: BUSPROG: Analytic
DISC: Operations Management

TOPICS: DESC.EVAB.17.02.01 The Deming Philosophy

KEYWORDS: Bloom's: Knowledge

2. Unlike other management gurus and consultants, Deming defined and described quality precisely.

- a. True
- b. False

ANSWER: False

DIFFICULTY: Difficulty: Easy

ACCREDITING STANDARDS: BUSPROG: Analytic
DISC: Operations Management

TOPICS: DESC.EVAB.17.02.01 The Deming Philosophy

KEYWORDS: Bloom's: Knowledge

3. Deming stressed that the highest levels of operational staff in an organization must assume the overriding responsibility for quality management.

- a. True
- b. False

ANSWER: True

DIFFICULTY: Difficulty: Moderate

ACCREDITING STANDARDS: BUSPROG: Analytic
DISC: Operations Management

TOPICS: DESC.EVAB.17.02.01 The Deming Philosophy

KEYWORDS: Bloom's: Knowledge

4. Improvements in operations are achieved by reducing the causes and impacts of variation.

- a. True
- b. False

ANSWER: True

DIFFICULTY: Difficulty: Easy

ACCREDITING STANDARDS: BUSPROG: Analytic
DISC: Operations Management

TOPICS: DESC.EVAB.17.02.01 The Deming Philosophy

KEYWORDS: Bloom's: Knowledge

5. Deming emphasized that knowledge is not possible without theory, and experience alone does not establish a theory.

- a. True
- b. False

ANSWER: True

61. The first point in Deming's 14 points for improving quality is "Create a vision and demonstrate commitment." Explain this point.

ANSWER: Create a vision and demonstrate commitment is the first point in Deming's 14 points for improving quality. An organization must define its values, mission, and vision of the future to provide long-term direction for its management and employees. Deming believed that businesses should not exist simply for profit; they are social entities whose basic purpose is to serve their customers and employees. To fulfill this purpose, they must take a long-term view, invest in innovation, education, and training, and take responsibility for providing jobs and improving a firm's competitive position. This responsibility lies with top management. Effective leadership begins with commitment, but making a commitment to quality and performance excellence is still difficult for managers. Even when managers have conducted a thorough assessment of their organization and know what they need to change, many do not effectively follow up on opportunities. 4 Reasons range from denial to excuses.

65. Describe the three steps to quality which summarize Feigenbaum's quality philosophy.

ANSWER: Feigenbaum's philosophy is summarized in his three steps to quality:

1. **Quality Leadership:** A continuous management emphasis is grounded on sound planning rather than reaction to failures. Management must maintain a constant focus and lead the quality effort.
2. **Modern Quality Technology:** The traditional quality department cannot resolve 80 percent to 90 percent of quality problems. This task requires the integration of office staff as well as engineers and shop-floor workers in the process who continually evaluate and implement new techniques to satisfy customers in the future.
3. **Organizational Commitment:** Continuous training and motivation of the entire workforce as well as an integration of quality in business planning indicate the importance of quality and provide the means for including it in all aspects of the firm's activities.

System

KEYWORDS: Bloom's: Knowledge

77. What was the major hurdle faced by Sears during the implementation of ISO 9001?

ANSWER: ISO 9001 implementation played a large role in assisting with process standardization across the company. ISO 9001 is often associated with the manufacturing industry, and one major hurdle Sears had to overcome was communicating the value of a QMS within a retail and service environment.

KEYWORDS: Bloom's: Knowledge

78. Give an example to show that ISO 9001 became a fundamental tool that provides Sears a safe base for continued improvements.

ANSWER: ISO 9001 became a fundamental tool that provides the company a safe base for continued improvements. For example, Sears has made dramatic improvements in calibrating the tools used for repairs and service calls. Although the company had calibrated some of its tools prior to implementing ISO 9001, the standard requires 100-percent tool calibration for safety purposes. Not only does Sears have an expansive program for calibrating its tools, but it has also opened and registered its own calibration lab to ISO/IEC 17025.

KEYWORDS: Bloom's: Knowledge

79. Give an example to show that the ISO 9001 implementation has helped Sears' efficiency in completing repairs.

ANSWER: The ISO 9001 standard helped Sears' efficiency in completing repairs. For instance, in the Chattanooga, Tennessee, carry-in facility, the average daily completion rate for repairing lawn mowers or other items doubled from four or five to eight or nine per repairman as a result of ISO 9001 implementation.

KEYWORDS: Bloom's: Knowledge

80. With regard to Quality Management System, define recall rate. Explain with an example how the technician recall rate has improved at Sears' because of the quality management system.

ANSWER: The recall rate is the percentage of times service technicians must return to customers' homes for a second time within 30 days. Sears' district office in Houston has improved its technician recall rate because of the QMS. Before the SST, the recall rate in Houston was about 12 percent. In 2004, Houston service technicians made more than a quarter of a million service calls, with a 9.3-percent recall rate. In 2005, the rate dropped to 7.9
