

ATI FUNDAMENTALS PROCTOR...What came out when I took it on 4/4/2019

1. A nurse is teaching the assistive personnel about upper body mechanics to prevent injury. Which of the following actions by the AP demonstrate an understanding of the teaching?

The AP keeps the object he is lifting close to his body

...the question was worded differently but "holding the object close to body" is a correct answer for one question.

2. A nurse is assessing a client who is immobile and notices a red area over the client's coccyx. Which of the following actions should the nurse take?

Change the client's position every 4 hours Apply

petroleum base ointment in the red area **Assess the**

red area for blanching

Use friction when cleansing the client's skin

...same thing for this question, wording is different, but an answer is "assess for blanching."

6. A nurse is planning care to prevent skin breakdown for a client who is immobile and has urinary incontinence. Which of the following actions should the nurse include in the plan of care.

Ans: request a prescription for an indwelling urinary catheter

8. A nurse is teaching a client who had an enucleation about care of an artificial eye. Which of the following information should be included in the teaching? (select all that apply)

Store the artificial eye in the label container filled with 0.9% sodium chloride irrigation

Remove from the artificial eye by retracting the upper eyelid **Apply**

pressure just below artificial eye to break the suction Clear the

artificial eye with hydrogen peroxide before storing Retract the upper

and lower lids to reinsert the artificial eye

...this exact question came out, I chose the 3 bolded answers.

10. A nurse is caring for a client who is 2 days postoperative following bowel resection and reports sudden severe abdominal pain. Which of the following actions should the nurse take first?

Determine areas of resonance across the abdomen using a systematic approach

Expose the client's abdomen to look for changes in appearance

Perform abdominal palpation by pressing gently with the finger pads Use the

diaphragm of the stethoscope to listen for bowel sounds

11. A nurse is providing care for a client who is to undergo a total laryngectomy. Which of the

following interventions is the nurses priority?

Determine the client's reading ability

Review the use of an artificial larynx

With the client schedule a support session

For the client explain the techniques of esophageal speech

...exact question and answer.

12. A home care nurse is teaching a client about home safety. Which of the following statements by the client indicates an understanding of the teaching? (select all that apply)

I will use the bars when getting in and out of the bath tub

need to check my medications for expiration dates

I need to have a fire escape plan with my family

I will apply tape over frayed areas of electrical cords

I need to set my hot water heater to 140 degrees Fahrenheit

...this SATA was exactly the same as well, I chose the bolded 3.

14. a nurse in an emergency department is assessing a client who reports a right lower quadrant pain, nausea and vomiting for the past 48 hours? Which of the following actions should the nurse take first?

Offer pain medication

Palpate the abdomen

Auscultate bowel sounds

Administer an antiemetic

15. A nurse is caring for a client who recently received a diagnosis of terminal cancer. Which of the following statement by the client partner indicates maladaptive coping?

Ans: I don't know of if I will be able to meet his physical needs.

16. A nurse is planning care for a client who has a stage 1 pressure ulcer on the right heel. The nurse should anticipate application of which of the following dressings?

Dry gauze

Transparent

Calcium alginate

Hydrogel

...this question was different but a question was asked about a Stage 1 pressure ulcer and "transparent self-adhesive" dressing was the answer I chose.

17. A nurse is caring for a client who has brain cancer and is transferring to hospice care. The client's son tells the nurse "I don't know what to tell my dad if he asks how he is going to die". Which of the
