TRUE/FALSE

1. The majority of operations performed on a typical database table utilize the SELECT statement.

    ANS: T   PTS: 1   REF: 30

2. When a user asks the database a question, the user is issuing a query.

    ANS: T   PTS: 1   REF: 31

3. Each section of a SQL command that begins with a keyword is known as a statement.

    ANS: F   PTS: 1   REF: 31

4. A clause is a section within a SQL statement that begins with a keyword.

    ANS: T   PTS: 1   REF: 31

5. SQL*Plus is an Oracle tool used to enter and edit SQL statements.

    ANS: T   PTS: 1   REF: 27

6. SQL*Plus can only be accessed via an internet interface.

    ANS: F   PTS: 1   REF: 27

7. A script file containing SQL statements can be executed from SQL*Plus.

    ANS: T   PTS: 1   REF: 27

8. The DESCRIBE command is used to view data in a table.

    ANS: F   PTS: 1   REF: 30

9. A query is accomplished by issuing a SELECT statement.

    ANS: T   PTS: 1   REF: 31

10. The asterisk symbol (*) can be used in a SELECT statement to indicate that all rows in the table should be displayed in the results.

    ANS: F   PTS: 1   REF: 31|32

11. A user can indicate that all columns of a table should be displayed in the results of a SELECT statement by including an asterisk (*) in the SELECT clause.

    ANS: T   PTS: 1   REF: 31|32

12. Column headings may be truncated in the results of a SELECT statement.

ANS: T   PTS: 1   REF: 32

13. The SELECT clause of the SELECT statement is used to identify which rows are to be retrieved from a specified table.

ANS: F   PTS: 1   REF: 31

14. Choosing specific columns to be displayed by a SELECT statement is known as selection.

ANS: F   PTS: 1   REF: 33

15. Choosing specific columns to be displayed by a SELECT statement is known as projection.

ANS: T   PTS: 1   REF: 33

16. If a column name is entered in lower case in the SELECT statement, the data for the column will be displayed in lower case in the results.

ANS: F   PTS: 1   REF: 34

17. If multiple column names are listed in the SELECT clause of a SELECT statement, the columns must be separated by a comma (,).

ANS: T   PTS: 1   REF: 34|35

18. The columns displayed in the results of a SELECT statement will be in the same order as they are stored in the database table.

ANS: F   PTS: 1   REF: 35

19. If you assign a column alias to a column, it must be enclosed in double quotation marks (" ").

ANS: F   PTS: 1   REF: 37

20. By default, a column alias is displayed in lower case characters in the results.

ANS: F   PTS: 1   REF: 37

21. The optional keyword AS can be used to indicate that the subsequent string of characters is a column alias.

ANS: T   PTS: 1   REF: 36|37

22. The following arithmetic operations can be performed in the SELECT clause of a SELECT statement: addition (+), subtraction (-), multiplication (*), division (/), and exponential (^).

ANS: F   PTS: 1   REF: 39

23. Parentheses can be used to override the order of operations in an arithmetic expression.

ANS: T   PTS: 1   REF: 39

24. The DIST or UNIQ keywords can be used to suppress duplicate data in the results of a SELECT statement.

ANS: F   PTS: 1   REF: 42|43

25. Concatenation refers to combining the results of several SELECT statements into one result.

ANS: F   PTS: 1   REF: 44|45

26. A double backslash (\\) is used to indicate concatenation in a SELECT statement.

ANS: F   PTS: 1   REF: 44|45

MODIFIED TRUE/FALSE

1. A(n) <u>CRBMDS</u> is a software program that can be used to create a relational database and allows you to enter, manipulate, and retrieve data. _____

ANS: F, RDBMS

PTS: 1   REF: 30|31

2. A(n) <u>WHERE</u> statement allows a user to retrieve data from a database table. _____

ANS: F, SELECT

PTS: 1   REF: 30|31

3. The <u>syntax</u> for a SQL statement gives the basic structure required to execute the statement. _____

ANS: T   PTS: 1   REF: 30|31

4. A query can be executed in the <u>SQL*Plus</u> tool. _____

ANS: T   PTS: 1   REF: 30|31

5. Each section of a statement that begins with a keyword is known as a(n) <u>buffer</u>. _____

ANS: F, clause

PTS: 1   REF: 31

6. The only required clauses for a SELECT statement are the <u>WHERE</u> and FROM clauses. _____

ANS: F, SELECT

PTS: 1   REF: 31

7. The <u>ALL</u> option can be used in the SELECT clause to indicate that all columns should be retrieved. _____

ANS: F, *

PTS: 1 REF: 31

8. Each clause of a SELECT statement <u>must</u> be entered on a new line in SQL*Plus.
   _____

   ANS: F, optional

   PTS: 1 REF: 31

9. The <u>SELECT</u> clause identifies the table containing the data to be queried.
   _____

   ANS: F, FROM

   PTS: 1 REF: 31

10. A column heading that is longer than the width of a column will not be truncated for a column that is defined to store <u>character</u> data. _____

    ANS: F, numeric

    PTS: 1 REF: 32

11. The <u>SELECT</u> command can be used to display the structure of a database table.
    _____

    ANS: F, DESCRIBE

    PTS: 1 REF: 29

12. Choosing specific columns from a database through a SELECT statement is known as <u>projection</u>.
    _____

    ANS: T   PTS: 1   REF: 33

13. In a(n) <u>SELECT</u> statement, keywords, table names, and column names are not case sensitive.
    _____

    ANS: T   PTS: 1   REF: 31

14. When listing more than one column name in the SELECT clause of a SELECT statement, the column names must be separated by <u>semicolons</u>. _____

    ANS: F, commas

    PTS: 1 REF: 34|35

15. The use of a column alias in the SELECT clause can be designated by the keyword <u>ALIAS</u>.
    _____

    ANS: F, AS

PTS: 1   REF: 36|37

16. If a column alias contains a blank space, it must be enclosed in <u>double</u> quotation marks.
_____

ANS: T   PTS: 1   REF: 37

17. By default, data within a numeric column is <u>right</u>-aligned when it is displayed.
_____

ANS: T   PTS: 1   REF: 38

18. By default, data within a character or data column is <u>right</u>-aligned when it is displayed.
_____

ANS: F, left

PTS: 1   REF: 38

19. Insignificant zeros <u>are</u> displayed for numeric columns by default to show two decimal places.
_____

ANS: F, are not

PTS: 1   REF: 39

20. When solving arithmetic expressions, Oracle11g always resolves addition and subtraction operations <u>first</u> from left to right in the expression. _____

ANS: F, last

PTS: 1   REF: 39

21. <u>Parentheses</u> can be used to override the order of operations in an arithmetic expression.
_____

ANS: T   PTS: 1   REF: 39

22. The <u>DISTINCT</u> keyword can be used to indicate that duplicate data should be suppressed in the results of a query. _____

ANS: T   PTS: 1   REF: 42

23. Combining the contents of two or more columns is known as <u>projection</u>.
_____

ANS: F, concatenation

PTS: 1   REF: 44|45

24. A string literal must be enclosed in <u>double</u> quotation marks. _____

ANS: F, single

PTS: 1   REF: 45

MULTIPLE CHOICE

1. Which of the following commands is used to issue a query?
   a. QUER   c. SELECT
   b. FROM   d. QUESTION

   ANS: C   PTS: 1   REF: 31

2. A(n) _____ has a predefined meaning in Oracle11g.
   a. keyword   c. syntax
   b. statement   d. clause

   ANS: A   PTS: 1   REF: 31

3. What is used to indicate the end of an SQL statement?
   a. /   c. ;
   b. :   d. *

   ANS: C   PTS: 1   REF: 31

4. The _____ for a SQL statement gives the basic structure, or rules, required to execute the statement.
   a. clauses   c. sequence
   b. keywords   d. syntax

   ANS: D   PTS: 1   REF: 31

5. To indicate which database table contains the data to be selected by a query, the table name should be listed in the _____ clause.
   a. SELECT   c. WHERE
   b. FROM   d. HAVING

   ANS: B   PTS: 1   REF: 31

6. Which of the following is a mandatory clause in a SELECT statement?
   a. FROM   c. HAVING
   b. WHERE   d. both a and b are mandatory

   ANS: A   PTS: 1   REF: 31

7. Which of the following symbols represents all the columns contained in a table?
   a. /   c. *
   b. ;   d. ^

   ANS: C   PTS: 1   REF: 31

8. The entire column heading for a column will be displayed, regardless of the assigned width of the column, if the column is defined as a(n) _____ column.
   a. character   c. date
   b. alphanumeric   d. numeric

   ANS: D   PTS: 1   REF: 33

9. Which of the following commands can be used to view the structure of a table?
   a. CONCATENATION   c. SELECT

b. DESCRIBE   d. none of the above

ANS: B   PTS: 1   REF: 30

10. Which of the following are case sensitive in Oracle11g?
    a. keywords   c. table names
    b. column names   d. none of the above

ANS: D   PTS: 1   REF: 31|32

11. If the results of a SELECT statement include more than one column of data, the column names must
    be separated in the SELECT clause by which of the following symbols?
    a. ,   c. ' '
    b. " "   d. *

ANS: A   PTS: 1   REF: 34

12. Which of the following statements is correct?
    a. The columns will be listed in the results in the same order they are stored in the database
       table.
    b. Character columns are listed first in the output, followed by numeric columns.
    c. The columns will be listed in the results in the same order they are listed in the SELECT
       clause of the SELECT statement.
    d. Numeric columns are listed first in the output, followed by character columns.

ANS: C   PTS: 1   REF: 35

13. Which of the following keywords can be used to indicate that a column alias should be included in the
    results?
    a. AS   c. SELECT
    b. FROM   d. ALIAS

ANS: A   PTS: 1   REF: 37

14. If a column alias contains a blank space, it must be enclosed in _____.
    a. single quotation marks (' ')   c. asterisks (* *)
    b. double quotation marks (" ")   d. percent signs (% %)

ANS: B   PTS: 1   REF: 36

15. A column alias must be contained within double quotation marks (" ") if it contains which of the
    following?
    a. blank spaces
    b. special symbols
    c. characters that should be displayed in lower or mixed case
    d. all of the above

ANS: D   PTS: 1   REF: 36

16. Which of the following types of columns will automatically right-align the data when it is displayed?
    a. character   c. alphanumeric
    b. date   d. numeric

ANS: D   PTS: 1   REF: 38

17. Which of the following types of columns will automatically left-align the column heading when it is displayed?
    a. character
    b. numeric
    c. date
    d. both a and c

    ANS: D   PTS: 1   REF: 38

18. What is the correct answer for the arithmetic expression 9+2*3-2 using the order of operations employed by Oracle*10g* when solving equations?
    a. 13
    b. 31
    c. 10
    d. 12

    ANS: A   PTS: 1   REF: 39

19. What is the correct solution for the arithmetic expression 2+8/2*9/3 using the order of operations employed by Oracle*10g* when solving equations?
    a. 0.1
    b. 4.8
    c. 15
    d. 14

    ANS: D   PTS: 1   REF: 39

20. What is the correct answer for the arithmetic expression 9+2*(3-4) using the order of operations employed by Oracle*10g* when solving equations?
    a. -11
    b. -18
    c. 9
    d. 7

    ANS: D   PTS: 1   REF: 39

21. What is the correct solution for the arithmetic expression (2+8)/2*9/3 using the order of operations employed by Oracle*10g* when solving equations?
    a. 1.336
    b. 4.8
    c. 15
    d. 14

    ANS: C   PTS: 1   REF: 39

22. Which of the following keywords can be included in a SELECT statement to suppress duplicate data?
    a. UNIQ
    b. DISTINCT
    c. SUPPRESS
    d. all of the above

    ANS: B   PTS: 1   REF: 42

23. Which of the following symbols can be used to combine data from different columns into one column of output?
    a. ||
    b. ^
    c. %
    d. *

    ANS: A   PTS: 1   REF: 44|45

24. Combining the contents of two or more columns is known as ____.
    a. projection
    b. concatenation
    c. selection
    d. suppression

    ANS: B   PTS: 1   REF: 44|45

25. A string literal must be enclosed in ____.
    a. single quotation marks (' ')
    c. asterisks (* *)

b. double quotation marks (" ")   d. percent signs (% %)

ANS: A   PTS: 1   REF: 45

    d. none of the above

    ANS: B   PTS: 1   REF: 29

46. Based upon the structure of the ORDERS table, which of the following SQL statements will return an error message upon execution?
    a. SELECT * FROM orders;
    b. SELECT order# customer# FROM orders;
    c. SELECT order#, "order number" FROM orders;
    d. both b and c

    ANS: C   PTS: 1   REF: 37

COMPLETION

1. _____ statements can be used to retrieve data from database tables.

    ANS: SELECT

    PTS: 1   REF: 30|31

2. A _____ is used to end a SQL statement.

    ANS: semicolon

    PTS: 1   REF: 31

3. The name of the table containing the data to be retrieved is specified in the _____ clause.

    ANS: FROM

    PTS: 1   REF: 31

4. The names of the columns to be retrieved are listed in the _____ clause.

    ANS: SELECT

    PTS: 1   REF: 31

5. Oracle11g comes in _____ editions.

    ANS: three (personal, standard, enterprise)

    PTS: 1   REF: 26

6. A SELECT statement is also referred to as a _____.

    ANS: query

    PTS: 1   REF: 31

7. If a column heading is longer than the assigned width of a(n) _____ field, the column heading will be truncated.

    ANS: character

PTS: 1   REF: 33

8. If a column heading is longer than the assigned width of a character column, the column heading will
    be _____.

    ANS: truncated

    PTS: 1   REF: 33

9. Choosing specific columns in a SELECT statement is known as _____.

    ANS: projection

    PTS: 1   REF: 33

10. A(n) _____ is an alternative column heading displayed in the output of a query.

    ANS: column alias

    PTS: 1   REF: 36

11. The optional keyword _____ can be used to distinguish between a column name and
     a column alias.

    ANS: AS

    PTS: 1   REF: 37

12. If you do not want a column alias to appear in all upper case characters, the column alias must be
     enclosed in _____ marks.

    ANS: double quotation

    PTS: 1   REF: 37

13. By default, the data for character fields are displayed _____ aligned when they are
     displayed.

    ANS:
    left
    left-

    PTS: 1   REF: 38

14. By default, the data for a numeric column is _____ aligned when it is displayed.

    ANS:
    right
    right-

    PTS: 1   REF: 38

15. You can include _____ to override the order of operations when solving arithmetic
     expressions.

ANS:
parentheses
( )

PTS: 1   REF: 39

16. The _____ keyword can be included in a SELECT statement to suppress the display of duplicate data.

ANS:
UNIQUE
DISTINCT

PTS: 1   REF: 42

17. Combining the contents of two or more columns is known as _____.

ANS: concatenation

PTS: 1   REF: 44|45

18. A(n) _____ can consist of numbers, characters, or special symbols that should be included in the output exactly as entered by the user.

ANS: string literal

PTS: 1   REF: 46

19. A string literal must be enclosed in _____ marks.

ANS:
single quotation
single-quotation
' '

PTS: 1   REF: 46

20. In an arithmetic expression, multiplication and _____ are always solved first in Oracle11g.

ANS: division

PTS: 1   REF: 39

21. When resolving arithmetic expressions, Oracle *10g* always performs the operations by starting on the _____ side of the expression.

ANS: left

PTS: 1   REF: 39

22. The _____ command can be used to display the structure of a table.

ANS: DESCRIBE

PTS: 1   REF: 29

23. A(n) _____ is included in the SELECT clause to indicate that all columns in the specified table should be listed in the results.

ANS:
asterisk
*

PTS: 1   REF: 31|32

ESSAY

1. When should double-quotation marks (" ") be used in a SELECT statement?

ANS:
Double-quotation marks are used when a column alias included in the SELECT statement contains blank spaces, special symbols, or to indicate that the column alias should be displayed in lower or mixed case.

PTS: 1   REF: 37

2. What are the mandatory clauses of a SELECT statement and what do they represent?

ANS:
The only mandatory clauses of a SELECT statement are the SELECT and FROM clauses. The SELECT clause is used to indicate the columns that are to be displayed in the results while the FROM clause is used to indicate the table containing the data to be displayed.

PTS: 1   REF: 31

3. Explain how the DISTINCT keyword effects a SELECT statement that lists two columns in the SELECT clause.

ANS:
The DISTINCT keyword will only suppress duplicate data if the combination of the data in the two columns is duplicated. If the combination of data in the referenced columns is unique for each record in the table, then each record will still be displayed in the results.

PTS: 1   REF: 42|43
