CUSTOM- MENTAL HEALTH IMPORTANT TOPICS ASN 1

Part 3: Question 101-150

Question: 101 of 201

Time Remaining: 15:30:32
Pause Remaining: 00:05:00

A nurse is caring for a client who has a depressive disorder. The client states, "I just can't feel any happiness or joy in life." Which of the following terms should the nurse use when documenting this finding?

Anhedonia

Anergia

Anosognosia

Akathisia

Question: 102 of 201

Time Remaining: 15:29:10
Pause Remaining: 00:05:00

A nurse in an acute care facility is admitting an older adult client who has dementia due to Alzheimer's disease. The nurse notes that the client's partner appears exhausted. He states that he is finding it more and more difficult to care for his wife. Which of the following interventions is the nurse's priority?

- Recommend that the partner place the client in a long-term care facility.
- Suggest that the partner see a counselor to help him cope with his exhaustion.
- Ask the partner to talk about his difficulties in caring for the client.
- Tell the partner to call a family meeting to get help.

Question: 103 of 201

Time Remaining: 15:26:58
Pause Remaining: 00:05:00

A nurse is caring for a client who is to start chemotherapy for advanced breast cancer. She tells the nurse she is worried about the adverse effects of the treatment. Which of the following responses should the nurse make?

- "I will have your provider discuss the adverse effects with you before the treatment begins."
- "Someone from the American Cancer Society will be here soon to answer your questions."
- "What is it about the adverse effects that concern you?"
- "I agree. Sometimes the adverse effects can be worse than the disease."

Question: 104 of 201

Time Remaining: 15:26:31
Pause Remaining: 00:05:00

A nurse is caring for a client who was admitted to the facility in critical condition following a cerebrovascular accident. The client's son says to the nurse, "I wish I could stay, but I need to go home to see how my children are doing. I really hate to leave." Which of the following responses should the nurse make?

- "Perhaps you could call your children to see how they are doing."
- "Don't worry. We'll take good care of your parent while you are gone."
- "You are feeling drawn in two separate directions."
- "There's nothing you can do here. You should go home to your children."

Question: 105 of 201

Time Remaining: 15:25:52
Pause Remaining: 00:05:00

A nurse on an acute mental health unit is caring for a group of clients. For which of the following clients is seclusion contraindicated?

An adult client following a suicide attempt

A school-age client who attempts to repeatedly bite staff

An adolescent client who throws objects at other clients

An older adult client who is manic and crying due to overstimulation
