This attempt took 2 minutes.

## Question 1

2 / 2 pts

According to the lesson, goal-directed exploration, increased physical and cognitive abilities, and achievements by trial and error are hallmarks of which stage of development?

Early childhood

Middle childhood

Toddlerhood

Adolescence

Middle childhood is an active period of growth and development. Goal-directed exploration, increased physical and cognitive abilities, and achievements by trial and error mark this stage.

## Question 2

2 / 2 pts

According to the Bates' Visual Guide video Head-to-Toe Assessment: Older Adult, the Get Up and Go Test assesses specifically for?

Parkinson's disease

Cerebellar function

Leg mobility

Cognitive impairment

The “Get Up and Go Test” is an assessment that should be conducted as part of a routine evaluation when dealing with older persons. Its purpose is to assess leg mobility to identify risk for falling.

### Question 3

2 / 2 pts

According to the lesson, a pregnant female can usually feel fetal movement by how many weeks gestation?

18 to 24

11 to 14

15 to 17

6 to 10

The examiner can usually feel movements externally after 24 gestational weeks; the mother can usually feel these by 18 to 24 weeks. The maternal sensation of fetal movement is traditionally known as “quickening.”

### Question 4

2 / 2 pts

According to the lesson, which of the following assessment tools is used to assess for depression?

MMSE

GAD

PHQ-2

APGAR

The PHQ-2 works as a screening tool for depression entails asking two simple questions about depressed mood and anhedonia (little interest or pleasure in doing things) that will detect a majority of depressed patients. Finding positive answers to these questions then requires further diagnostic tools to assess specific depressive disorders.

## Question 5

2 / 2 pts

According to the lesson, being aware of one's own existence, feelings, and thoughts and of the environment is the definition of what?

Perception

Attention

Consciousness

Orientation

Consciousness means being aware of one's own existence, feelings, and thoughts and of the environment. This is the most elementary of mental status functions.
